centralwOrld:
Turning Everyday Visits Into Unforgettable mOments

Arnav Bella Adeline James

Vision Consulting

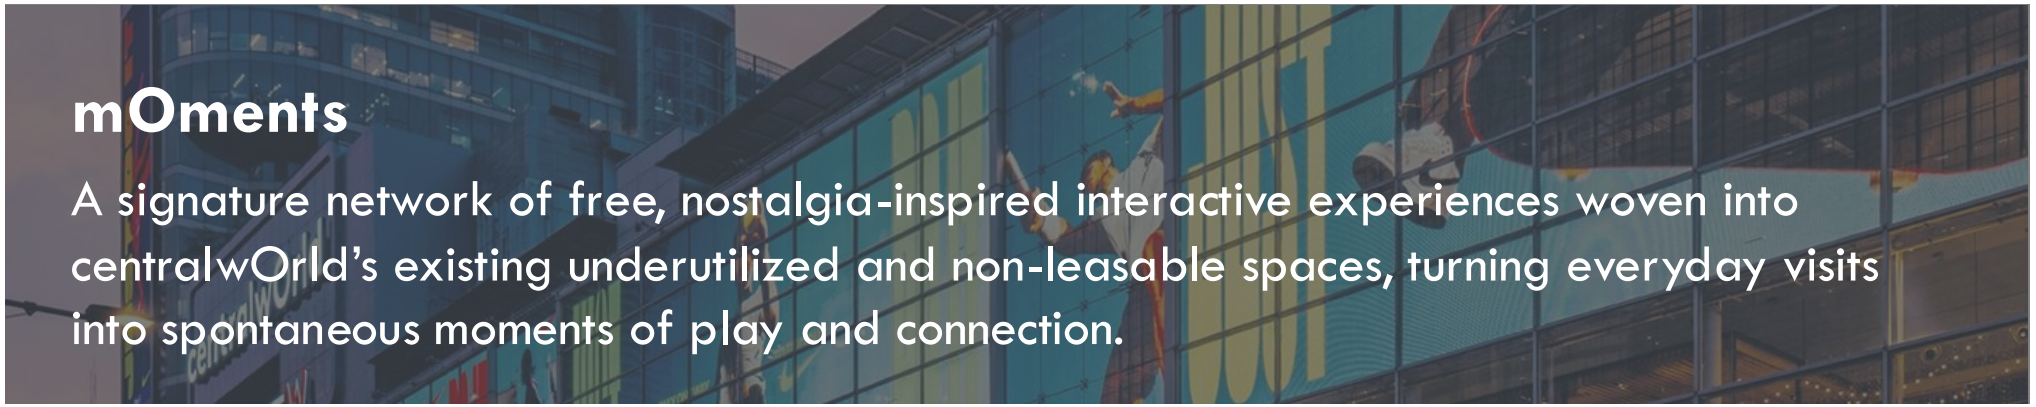

Executive Summary

CENTRAL PATTANA

Situation

How can CPN transform centralwOrld into a next-generation flagship destination that becomes Thai Gen Z's preferred "third place", while continuing to serve its existing core customers and creating a commercially sustainable model that can evolve over time?

Solution

mOments

A signature network of free, nostalgia-inspired interactive experiences woven into centralwOrld's existing underutilized and non-leasable spaces, turning everyday visits into spontaneous moments of play and connection.

Impact

+520K	+4,700K	+2.2bn
Incremental Gen Z Visits	Completed mOments	Incremental Tenant Sales

Right now, “third place” visits are shaped by proximity, convenience, and purpose

CENTRAL PATTANA

WHY PEOPLE VISIT MALLS

1

Geographic Proximity

Nearby homes and universities influence which malls people visit most[1]

2

Routine Convenience

Work, transit, and mixed-use locations make mall visits easy to repeat[2]

3

Specific Retail Needs

Desired brands and services give shoppers a clear reason to visit[3]

WHAT BANGKOK RESEARCH SHOWS

Proximity Drives Selection

In a survey of 400 mall visitors, proximity to home was a leading visit driver; 59% of respondents were aged 18–25[4]

Workspace Generates Footfall

At La Villa Ari, weekday visitors were often nearby workers, demonstrating how existing routines drive mall traffic[5]

Retail Mix Shapes Frequency

A study of 395 Bangkok shoppers linked one-stop shopping and convenience to visit frequency and time spent at malls[6]

Source: (1,2, 4, 5) Chulalongkorn University, (3, 6) JBMR

centralwOrld has built the destinations, but what about the experiences between them?

NEED 6: Move & Stay Active – *addressed by The Rink & Bowling Alley*

The Assets Are There.

The mOments In Between Are The Opportunity.

A sense of belonging is what turns a third place into a preferred destination

CENTRAL PATTANA

BELONGING BEGINS WITH ACCESSIBLE, MEANINGFUL EXPERIENCES

LOW-FRICTION PARTICIPATION

Affordability Matters

69% of surveyed Thai Gen Z cited costs as a financial concern and major deterrent[1]

Spontaneity Drives Appeal

79% of surveyed young adults value spontaneous or unpredictable experiences[2]

Connection Without Pressure

58% prefer experiences where socializing is present, but isn't the main focus[3]

PERSONAL & SOCIAL CONNECTION

Playful Discovery

Novelty was the strongest satisfaction predictor in a study among 400 Thai Gen Z participants[4]

Personal Expression

Self-image alignment positively predicted Gen Z experience satisfaction[5]

Experiences Worth Sharing

Social motivation predicts satisfaction, which was linked to online sharing[6]

Sources: *(1) Krungsri, (2, 3) Eventbrite, (4, 5, 6) JSMR*

The sweet spot is where the experiences create value without compromising the core retail business

CENTRAL PATTANA

Low Opportunity Cost

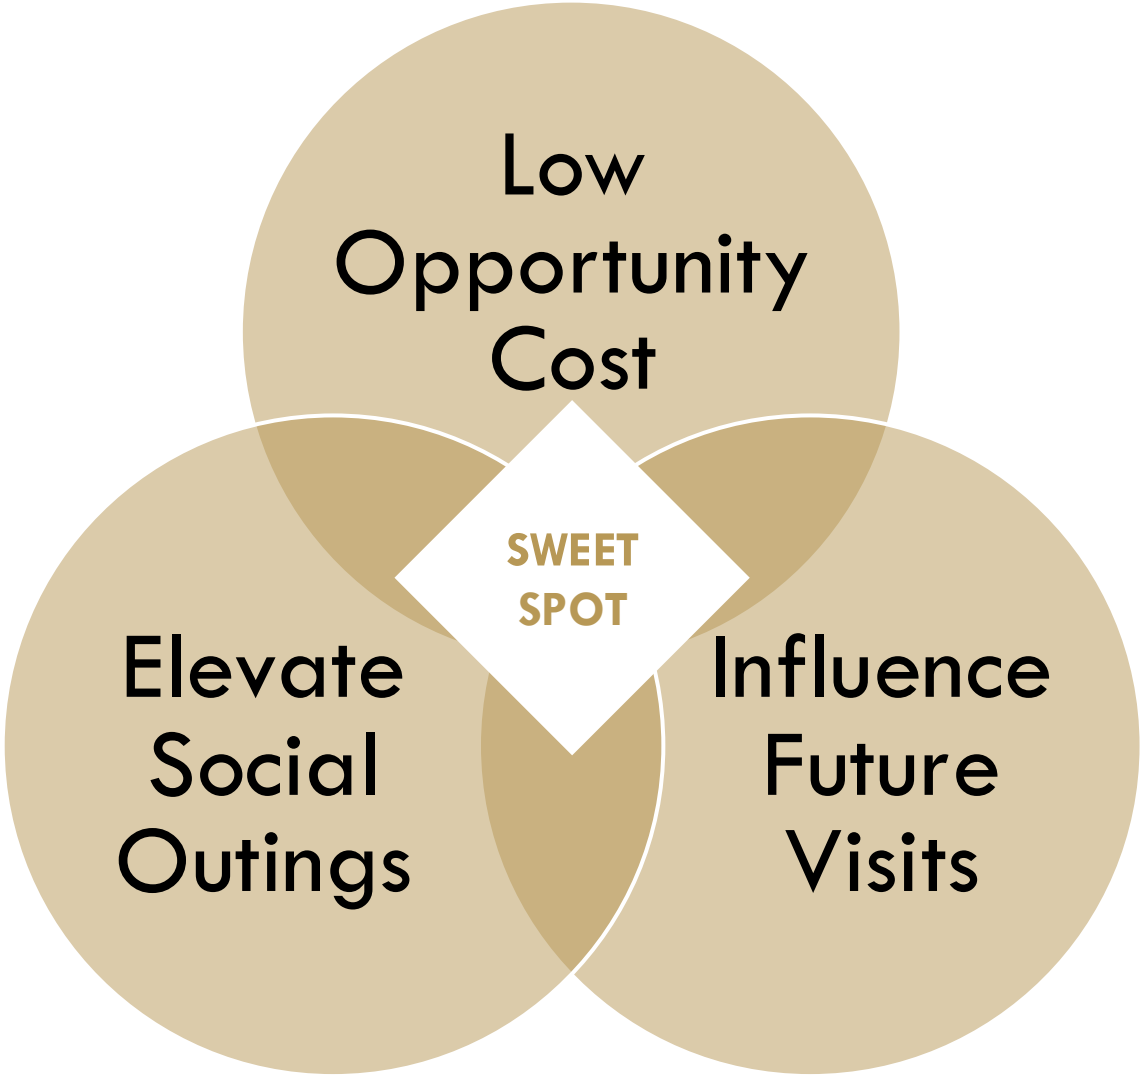

With 96% occupancy[1], new experiences must create value without displacing tenants or sacrificing productive space

Elevate Social Outings

Visitors already come to shop, dine, and socialize; spontaneous experiences should enrich these outings without requiring separate plans

Influence Future Visits

In a competitive third place market, memorable experiences should give visitors another reason to choose centralwOrld again

Source: (1) Case Book

centralwOrld's next experience must build on its strengths, not disrupt them

CENTRAL PATTANA

96% occupancy leaves **limited room** for new developments without **tenant displacement** or rental trade-offs

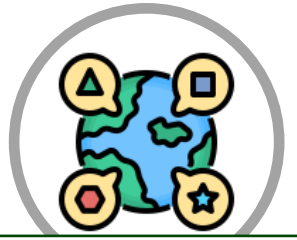

Existing destinations like **TK Park and Groove serve Gen Z needs**; new concepts must complement, not cannibalize them

Gen Z accounts for ~20% of visitors; **new experiences** must still **appeal** to centralwOrld's **broader audience**

ASSETS TO PRESERVE

Existing Social Spaces

Diverse Customer Base

Established Tenant Mix

DESIGN IMPLICATIONS

1. **Integrate, Don't Replace**
   Utilize the existing environment without major reconstruction or tenant displacement

2. **Activate Shared Intent**
   Add accessible experiences that enrich current offerings and appeal across generations

The Opportunity Lies Between Existing Destinations, Not in Replacing Them.

Conventional solutions address individual needs, but struggle to meet centralwOrld's full strategic requirements

CENTRAL PATTANA

CRITERIA	Co-Working Space	Cafe	Social Clubhouse	Full Interior Redesign
Low Opportunity Cost	 *Negative NPV: -20mn*	 *Negative NPV: -31mn THB*	 *Negative NPV: -22mn THB*	 *Negative NPV: -50mn THB*
Elevate Social Outings	 *Individual-focused use*	 *Casual social gatherings*	 *Planned group activities*	 *Aesthetics over interaction*
Influence Future Visits	 *Limited audience appeal*	 *Easily substituted elsewhere*	 *Niche, repeat appeal*	 *Novelty fades quickly*
Incremental Tenant Value	 *TK Park overlap*	 Spend substitution	 Limited spillover	 Uncertain sales uplift
Low Cannibalization	 *Duplicates TK Park*	 *Competes with existing F&B*	 *Overlaps with Groove*	 *Unlikely – low margins*

Conventional solutions address individual needs, but struggle to meet centralwOrld's full strategic requirements

Managing engagement, sponsorship, safety and privacy risks supports mOments' sustainable rollout

CENTRAL PATTANA

Risk Matrix

RISKS

1. **Weak sponsor returns reduce sponsorship demand and renewals**
2. **Crowding and physical play disrupt shoppers or cause injuries**
3. **Low participation and fading novelty limit repeat engagement**

MITIGATION

1' Enable instant play without mandatory registration; make Central X optional for saving scores and photos; refresh games and challenges regularly

2' Use safety-approved spaces; keep exits and storefronts clear; contain queues, limit noise and inspect equipment daily

3' Enable instant play without mandatory registration; make Central X optional for saving scores and photos; refresh games and challenges regularly

We’re looking for
our third place
mOments bring
us together
Shared memories
bring us back

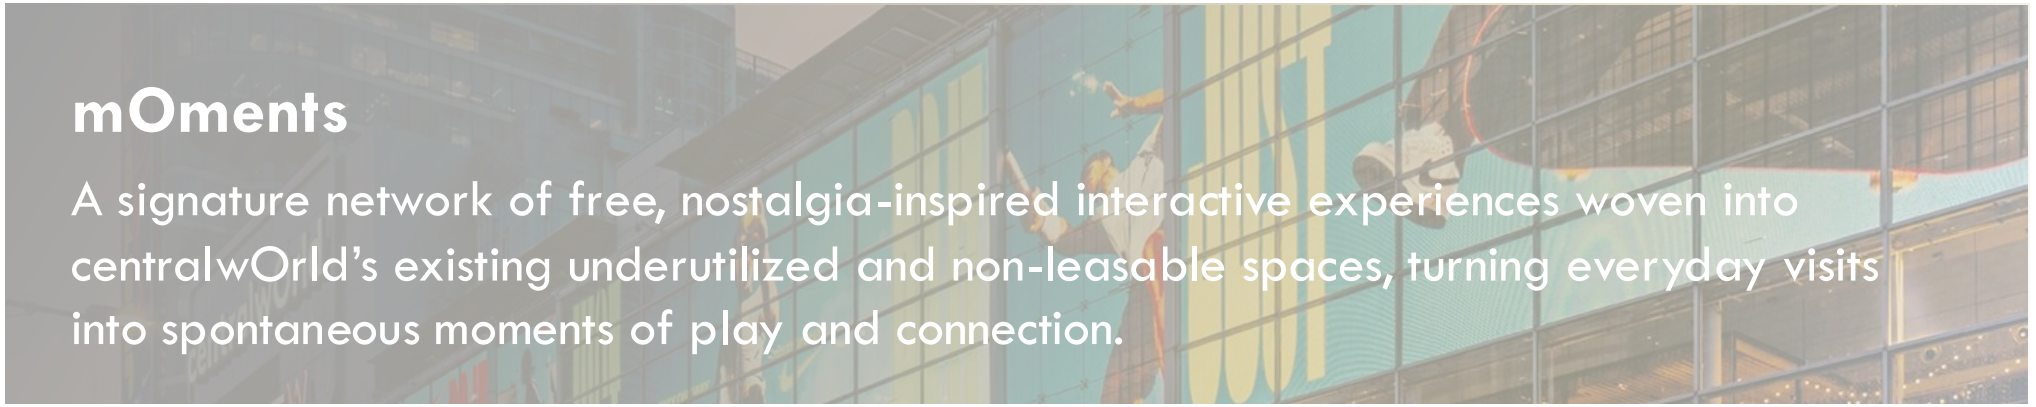

Executive Summary

CENTRAL PATTANA

A1: JMSR Study on Gen Z Personal & Social Connection

CENTRAL PATTANA

Playful Discovery

Novelty was the strongest satisfaction predictor in a study among 400 Thai Gen Z café-goers (β = .247)[4]

Personal Expression

Self-image alignment positively predicted Gen Z experience satisfaction (β = .166)[5]

Experiences Worth Sharing

Social motivation predicted satisfaction (β = .209), which was linked to online sharing (β = .461)[6]

Source: Journal of Management Science Research

Thai Gen Z Café-Hopping Study (2026)

Objective: Examine how novelty, social motivation, self-expression, and FOMO influence satisfaction and online word-of-mouth among Thai Gen Z café-goers.

Methodology: Online survey of 400 Thai Gen Z consumers aged 19–30, using convenience sampling and regression analysis. 91% of respondents were students.

Key Findings:

Novelty seeking (β = 0.247) and social motivation (β = 0.209) were the strongest predictors of satisfaction.

FOMO (β = 0.180) and self-image congruence (β = 0.166) also showed significant positive associations.

Satisfaction was positively associated with electronic word-of-mouth (β = 0.461).

Strategic Relevance: Supports mOments' emphasis on novelty, social interaction, personalization, and shareable experiences.

Limitation: Findings are specific to café-goers, heavily student-represented, and do not establish effects on mall visitation or spending.

A2: Current Seating Areas

A3: The components of a mOment

CENTRAL PATTANA

1 Experiential

54% of surveyed Gen Z consumers want tools that let them **try products in-store**[1]

Implication: Give visitors something to actively **try, create or play** — not just another display

2 Exploratory

A six-year study of **43,326** mall customers linked **longer shopping visits** to higher same-visit spending[2]

Implication: Distribute mOments **near relevant tenants** to create additional store encounters — not movement for its own sake

3 Low-commitment

Cost of living is the leading concern among surveyed Thai Gen Z, cited by **38%**[3]

Implication: Participate **without buying, booking or membership** — free participation removes spending as a condition of belonging

4 Nostalgic

A Bangkok Gen Z study linked **nostalgic storytelling** to demand for retro cameras[4]

Implication: Reinterpret **personally meaningful memories** through modern interactive experiences

5 Social

38% of Thai Gen Z aged 18–24 reported **loneliness** — the highest share among generations surveyed[5]

Implication: Design activities that make **spending time together** easier and more enjoyable

6 Complementary

Team design principle: each experience **connects to the existing mall ecosystem**

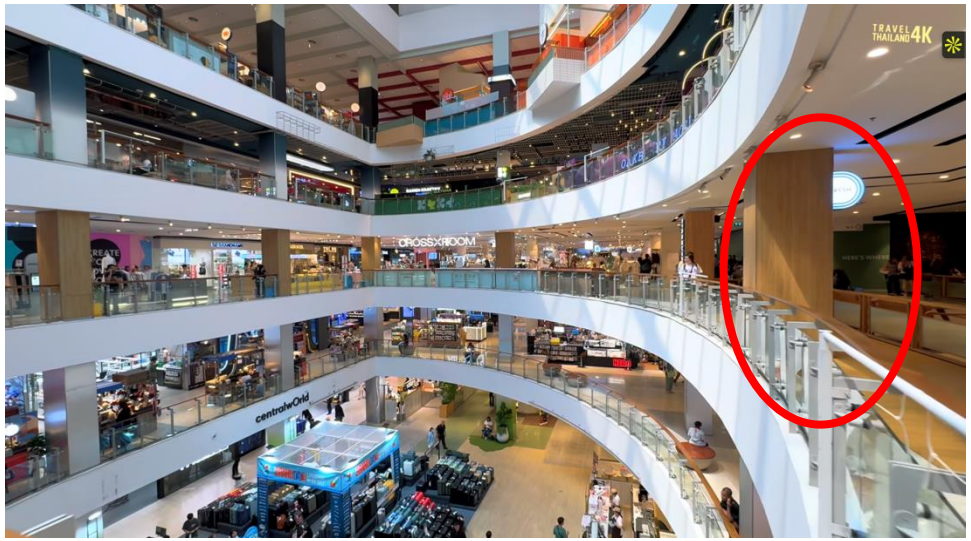

Implication: Link each mOment to **nearby tenants, dining and existing communities**

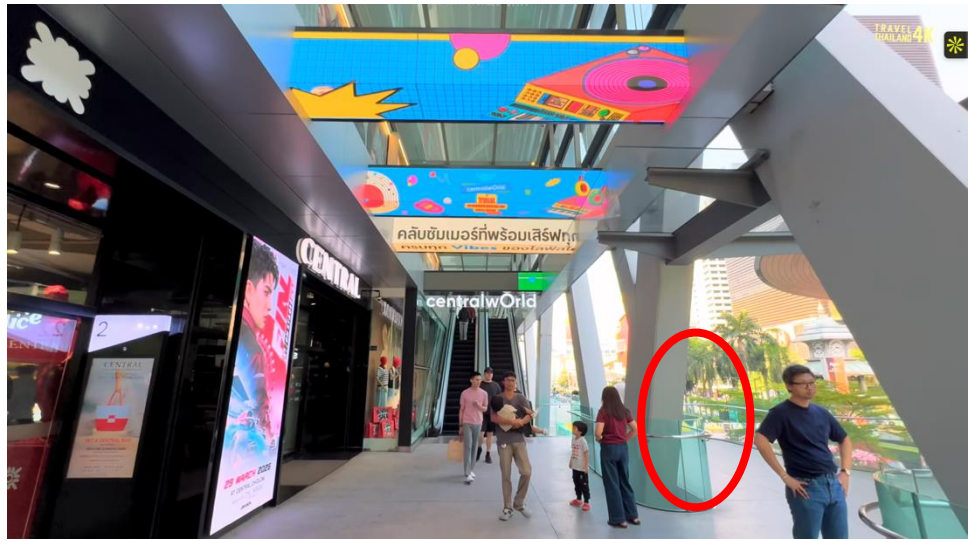

mOments lets Gen Z try, explore, and connect for free; it is placed where it creates encounters with relevant tenants

Source: [1] IBM/NRF (2018); [2] Journal of Retailing and Consumer Services (2021); [3] Deloitte Thailand (2025), p. 10; [4] Journal of Communication Arts, Chulalongkorn (2019); [5] Mintel (2022)

A4: Potential Areas of Installation

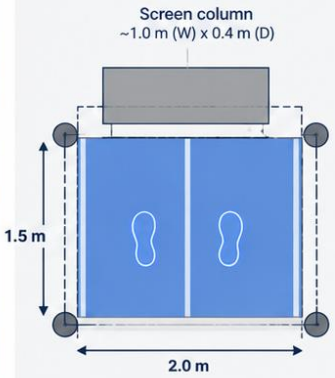

Ministerial Regulation No. 55 states that internal corridors in public and commercial buildings must generally be at least **1.50 metres wide.**[2] However, that is only a generic statutory minimum. centralwOrld's approved fire-evacuation design, occupant load and internal safety standards may require much wider clear routes.

Source: [1] Travel Thailand 4k via YouTube (2026); [2] Ministerial Regulation No. 55

A5: mOments Installation Sizing and Location Selection

Top-down view (footprint)

Estimated footprint per installation

~3.0 m²
(2.0 m x 1.5 m)

Interactive screen column ~1.0 m (W) x 0.4 m (D)	= 0.4 m²
Play area (floor mat) 2.0 m (W) x 1.5 m (D)	= 3.0 m²
Total footprint (including buffer)	**~3.0 m²**

(fits comfortably within main circulation areas)

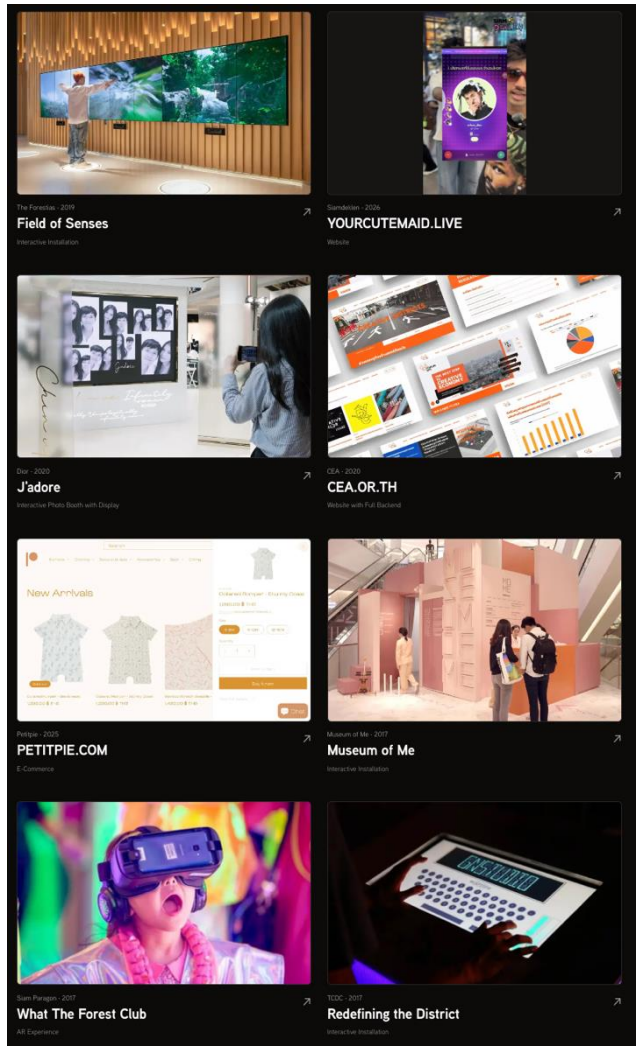

Use approved pockets beside existing gathering areas, with safe circulation and contained queues. Larger movement experiences require designated activity areas.

The space decision should cover:

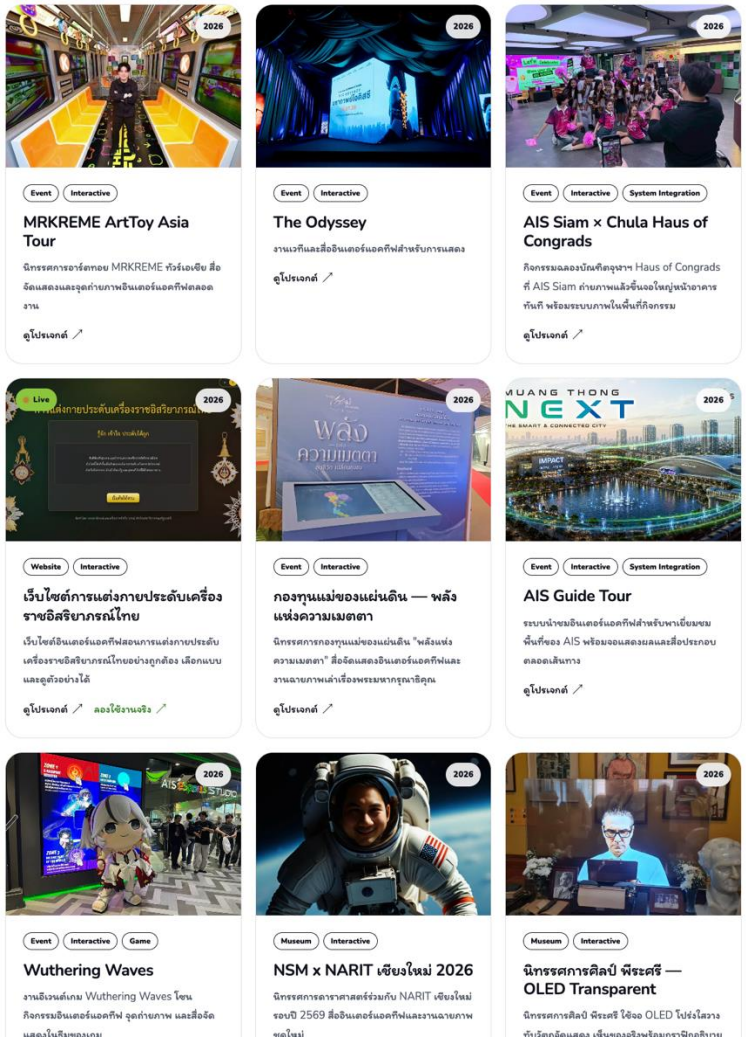

- Footprint including players, spectators and waiting visitors.
- Power, connectivity and equipment access.
- Accessible participation and routes.
- Installation during operating hours or overnight.
- Temporary versus permanent treatment.
- Existing activation revenue displaced, even where no retail rent is lost.

A6: Potential vendors

Pug-in Studio

T-Stone

Funplus

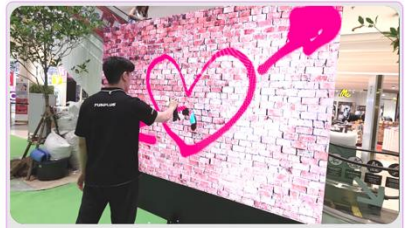

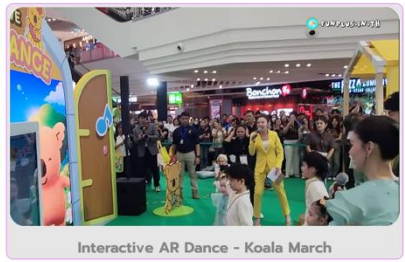

What we do

สร้างประสบการณ์ที่แตกต่างด้วยเทคโนโลยีอินเตอร์แอคทีฟจาก Funplus ผู้เชี่ยวชาญด้าน Interactive Game, Immersive Room, Interactive Wall, 3D Mapping และ Digital Experience ครบวงจร พร้อมออกแบบและพัฒนาระบบเฉพาะสำหรับงานอีเว้นท์ นิทรรศการ และกิจกรรมทางการตลาด เพื่อเพิ่ม Engagement และสร้างความประทับใจให้กับทุกผู้เข้าร่วมงาน

A7: Experiential purchases, as memorable moments in consumers' lives, trigger nostalgia

CENTRAL PATTANA

- **Core Premise:** The research investigates how different types of consumer spending affect emotional outcomes, specifically focusing on the past-oriented emotion of nostalgia. It argues that experiential purchases (lived events and experiences) trigger higher levels of nostalgia than material purchases (physical objects).
- **The Mechanism:** Experiential purchases hold an advantage because consumers view them as more meaningful life moments and memories, which naturally elicit stronger feelings of nostalgia.
- **Methodology:** The authors conducted three experimental studies. In the first two studies, participants were randomly assigned to recall either an experiential or a material purchase, and then measured for nostalgia, the meaningfulness of the memory, and repurchase intention. The third study directly manipulated the "meaningful moment" variable.
- **Key Findings:** The studies consistently showed that recalling an experiential purchase leads to higher nostalgia compared to a material purchase. Additionally, this triggered nostalgia has an indirect, positive effect on a consumer's "repurchase intention," meaning they are more likely to want to have similar experiences in the future.
- **Practical Takeaway:** The authors note that for consumers with limited income who want to spend their money wisely, allocating resources toward experiences rather than material goods yields greater happiness and builds a collection of meaningful memories.

A8: Psychological Warranting for Repeatability

CENTRAL PATTANA

A Study on Satisfaction and Revisit Intention by Types of Pop-up Store Spatial Experiences: Focusing on College Students

Summary: Examines how playful, immersive pop-up store experiences influence Gen Z's satisfaction and willingness to revisit. Focuses on whether enjoyment and emotional engagement encourage repeat participation beyond transactional motivations.

Methodology: Online survey of **264 South Korean students aged 18–28** who visited at least one of **25 pop-up stores**. Researchers used cluster analysis and multiple regression to compare frequent and occasional visitors.

Key Findings: Enjoyment and emotional refreshment were **positive predictors of revisit intention across both visitor groups**, while occasional visitors also responded positively to free or limited-edition benefits. Frequent visitors demonstrated **2–2.5× greater consumption in tech/IP/sports and other commercial pop-up categories**, suggesting strong engagement with experience-led formats.

Implication for mOments: Playful, emotionally rewarding interactions may encourage visitors to return, particularly when experiences offer novelty and opportunities for repeated enjoyment.

Source: Korean Open Access Journals

A9: Lu et al. Case Study on Nostalgia

CENTRAL PATTANA

Study: Lu et al. (2022), *Frontiers in Psychology*

Methodology: Survey of **291 Chinese travelers** recalling memorable overseas travel experiences. Researchers used structural equation modeling to examine relationships between memories, nostalgia, destination attachment, and revisit intentions.

Psychological Relationship	Statistical Finding	Key Insight
Memorable Experience → Nostalgia	**β = 0.767**	Memorable experiences strongly correlate with nostalgic feelings.
Nostalgia → Destination Attachment	**β = 0.402**	Nostalgia strengthens emotional connections to a destination.
Nostalgia → Revisit Intention	**β = 0.218**	Nostalgic feelings positively predict the desire to return.
Memorable Experience → Revisit Intention	**β = 0.267**	Lasting positive memories directly predict return intentions.

Key Takeaway: Memorable experiences can create lasting emotional associations with a destination. Recalling these experiences may strengthen nostalgia and attachment, making visitors more inclined to return.

Application to mOments: Central X's personalized memory flashbacks could resurface positive experiences from past visits, potentially renewing visitors' emotional connection to CentralWorld and encouraging future trips.

Source: *Frontiers in Psychology*

A10: Snapchat Case Study

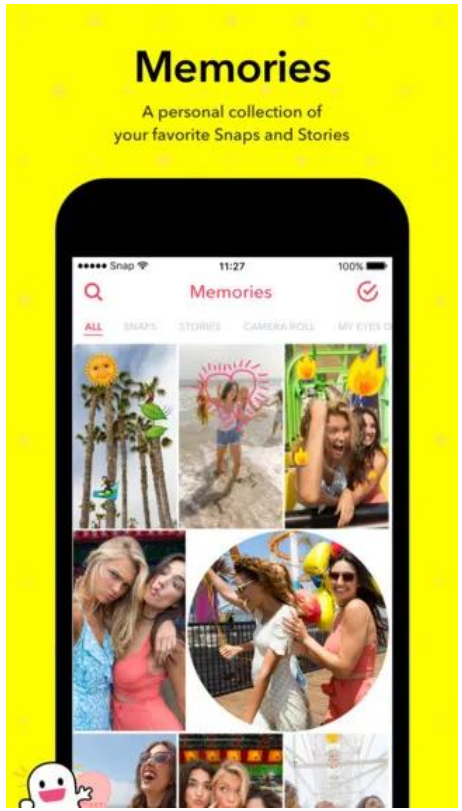

Why personal memories matter

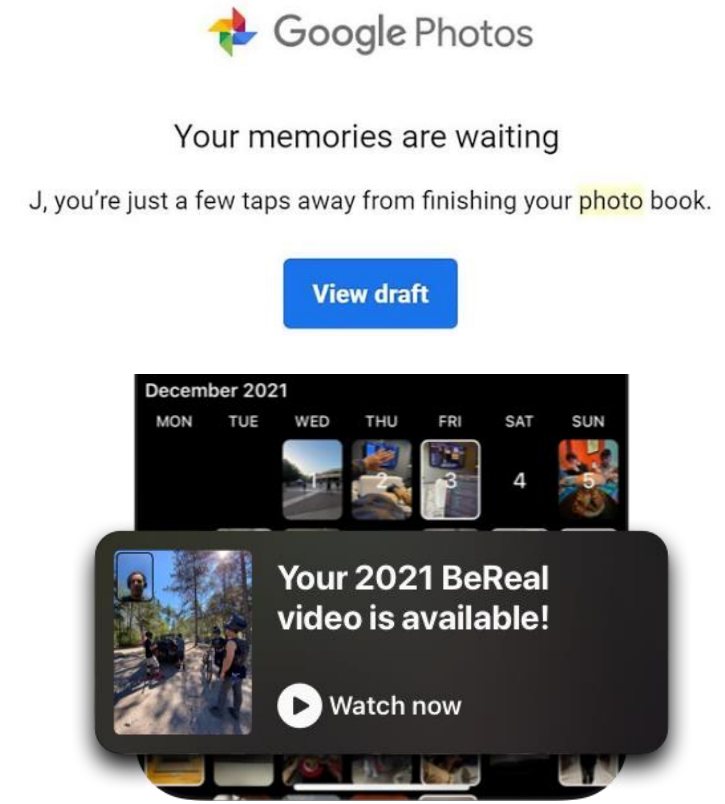

1T+ Snapchat Memories saved since 2016[1]; Flashbacks resurface Snaps from 1+ year ago to revisit or share[2] → saved experiences get **another opportunity to be revisited and shared**

Positive reminiscence	Revisiting pleasant experiences can enhance positive emotions[3] → **Visitors enjoy the visit again after leaving**
Social connectedness	Recalling meaningful moments can strengthen connection[4] → **Capture people and reactions, not the leaderboard**
Place attachment	461 sport tourists: nostalgia linked to venue attachment[5] → **CentralWorld becomes tied to personal experiences**
Photo-cued recall	Photos aided recall, linked to revisit intention[6] → **A personal video is a memory cue, not an ad**

Opt in	Day 0	~Day 30	Yearly
Ask after saving; memory and promo reminders **controlled separately**	In-app: **"Your video is ready"**	One optional push: **Watch your memory** → then "Invite Ploy for a rematch"	Anniversary resurfacing, **only if users want it**

User control: Hide this memory · Remind me less · Turn off reminders. Never resend ignored alerts or auto-contact friends[7]

Central X preserves personal memories and resurfaces them thoughtfully, keeping CentralWorld meaningful between visits

Source: [1] Snap Inc. (Sep 2025); [2] Snapchat Support; [3] Reminiscence study; [4] Univ. of Southampton; [5] Sport-tourist nostalgia study, S. Korea; [6] Tourism photo-recall study; [7] Apple HIG

A11: KPI Explanations

CENTRAL PATTANA

Stage	Why measure these commercial KPIs?
Discover	**Acquisition cost** tests whether promotion brings visitors efficiently. **Sponsorship revenue** tests whether brands will pay for the platform.
Arrive	**Incremental arrivals** tests whether mOments attracts additional visits rather than entertaining existing visitors. **Cost per additional arrival** tests acquisition economics.
Navigate	**Referred store visits and conversion** test whether app guidance delivers people to tenants—not merely generates direction clicks.
Explore	**Store-entry uplift and stores visited** test whether distributed stations spread traffic across the ecosystem instead of concentrating it around screens.
Participate	**Revenue per interaction** measures monetization efficiency. **Trial-to-purchase conversion** tests whether relevant product experiences lead to purchases.
Spend time	**Sales uplift and purchaser conversion** test whether enjoyable participation translates into tenant business—not just longer dwell.
Depart → Return	**Returning participants' spending** measures ongoing tenant value. **Cost per returning participant** tests whether retaining engagement is economically worthwhile.

A12: Why No Co-Working Space

CENTRAL PATTANA

Evaluation Criteria	Co-Working Space
Low Opportunity Cost	*Negative NPV: -20mn*
Elevate Social Outings	*Individual-focused use*
Influence Future Visits	*Limited audience appeal*
Incremental Tenant Value	*TK Park overlap*
Low Cannibalization	*Duplicates TK Park*

Why No Co-Working Space?

Evaluation against CentralWorld's strategic criteria

CENTRAL PATTANA

Co-working is costly, duplicative, and too niche to solve CentralWorld's broader Gen Z challenge.

Evaluation Criteria	Score (out of 5)	Key Reason
Low Opportunity Cost	Negative NPV: -20mn	Requires dedicated leasable area, fit-out, and operating support, yet still underperforms higher-yield tenant uses.
Elevate Social Outings	Individual-focused use	Primarily serves work or study needs, rather than enhancing the spontaneous, shared outing most Gen Z visits revolve around.
Influence Future Visits	Limited audience appeal	May attract a narrow group of students or remote workers, but does not address a broadly shared Gen Z need at scale.
Incremental Tenant Value	Narrow spillover potential	Potential spillover is concentrated and uncertain, with limited mall-wide value across the broader tenant ecosystem.
Low Cannibalization	Duplicates TK Park	Overlaps heavily with TK Park's existing study and work use case, creating high cannibalization risk instead of incremental demand.

A13: Why No Café?

CENTRAL PATTANA

Evaluation Criteria	Cafe
Low Opportunity Cost	*Negative NPV: -31mn THB*
Elevate Social Outings	*Casual social gatherings*
Influence Future Visits	*Easily substituted elsewhere*
Incremental Tenant Value	Spend substitution
Low Cannibalization	*Competes with existing F&B*

Why No Cāfé?

Evaluation against CentralWorld's strategic criteria

CENTRAL PATTANA

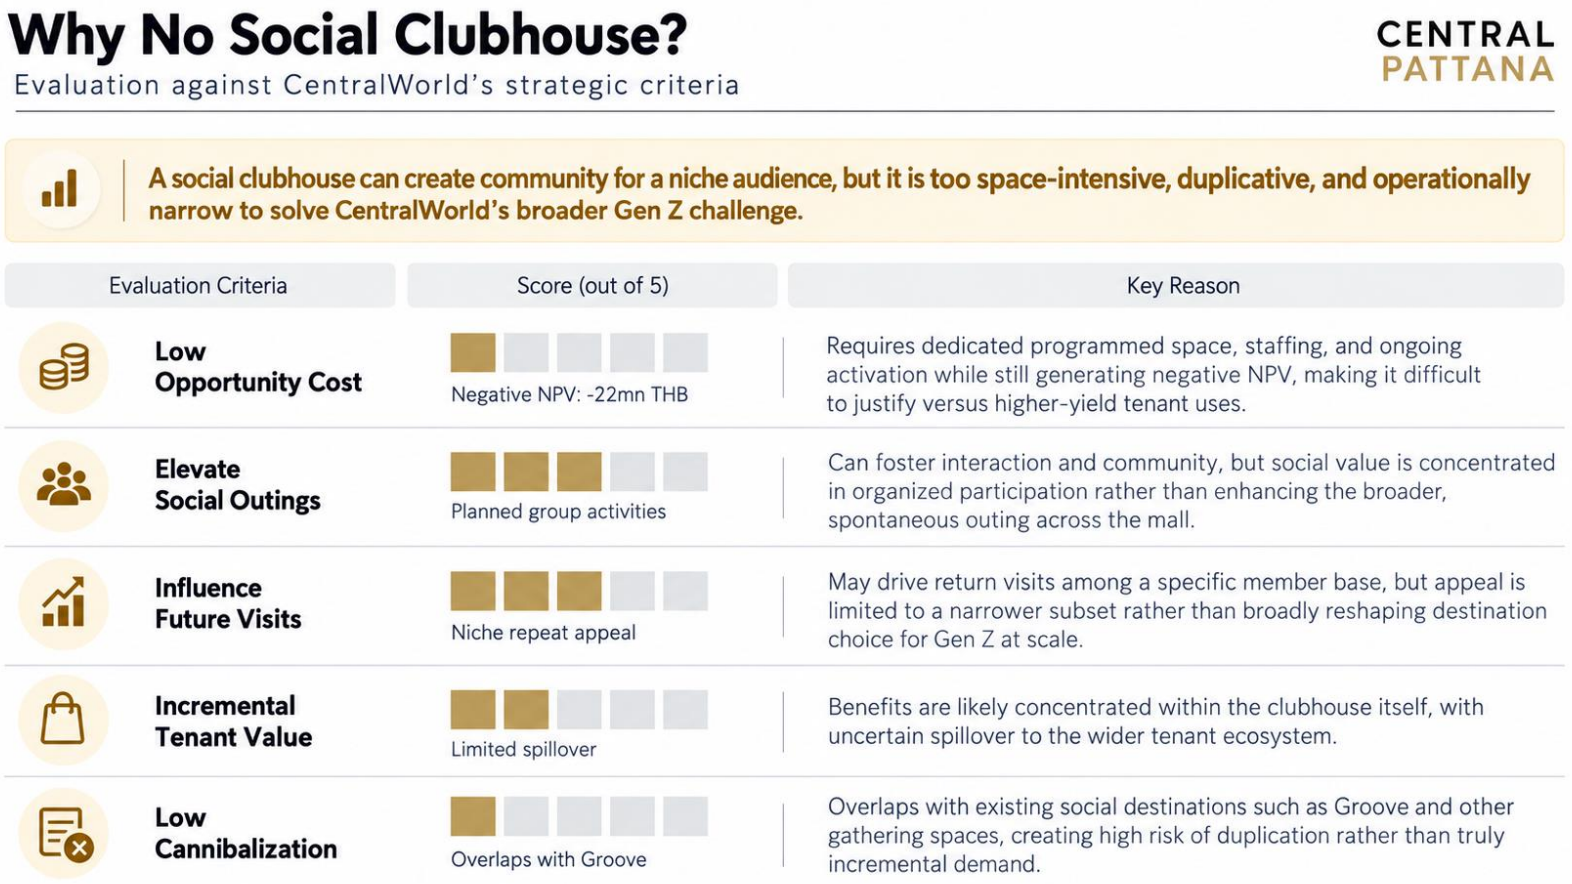

A new café is social and familiar, but too substitutable and cannibalistic to reshape CentralWorld's broader Gen Z demand.

Evaluation Criteria	Score (out of 5)	Key Reason
Low Opportunity Cost	Negative NPV: -31mn THB	Requires dedicated leasable area and still generates negative NPV, making it difficult to justify versus higher-yield tenant uses.
Elevate Social Outings	Casual social gatherings	Naturally supports hanging out and conversation, making it a credible social venue for informal meetups.
Influence Future Visits	Easily substituted elsewhere	Cafés are ubiquitous across malls and the city, so a new café adds little distinctiveness or pull to change destination choice.
Incremental Tenant Value	Spend substitution	Spending is likely to be substituted from existing F&B rather than generating broad-based new demand across the tenant ecosystem.
Low Cannibalization	Competes with existing F&B	Directly competes with CentralWorld's established food-and-beverage offer, including Groove, creating high cannibalization risk.

A14: Why No Social Clubhouse?

CENTRAL PATTANA

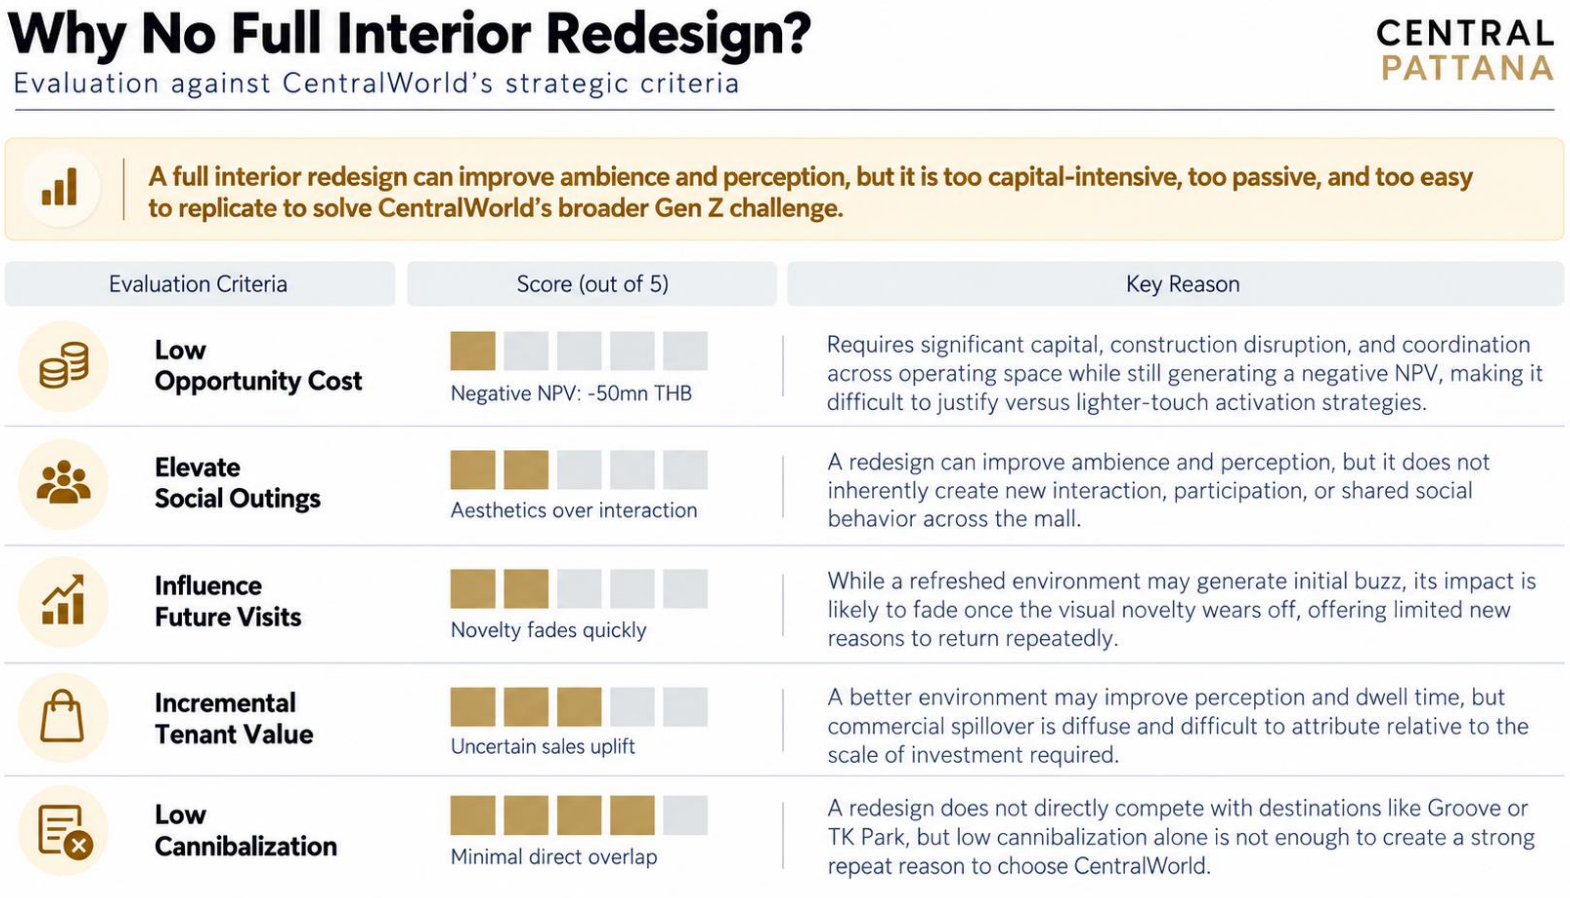

Evaluation Criteria	Social Clubhouse
Low Opportunity Cost	*Negative NPV: -22mn THB*
Elevate Social Outings	*Planned group activities*
Influence Future Visits	*Niche, repeat appeal*
Incremental Tenant Value	Limited spillover
Low Cannibalization	*Overlaps with Groove*

A15: Why No Full Interior Redesign?

CENTRAL PATTANA

Evaluation Criteria	Full Interior Redesign
Low Opportunity Cost	*Negative NPV: -50mn THB*
Elevate Social Outings	*Aesthetics over interaction*
Influence Future Visits	*Novelty fades quickly*
Incremental Tenant Value	Uncertain sales uplift
Low Cannibalization	*Unlikely – low margins*

A16: 1F: Paper Dolls Become a 2-person Styling Challenge

CENTRAL PATTANA

1F: Bridge Line & High-end Fashion

Tenant fit: Coach (bags and accessories) lists its CentralWorld store on 1F[1]; other nearby fashion tenants could rotate in once confirmed

The Activity

Pick an occasion — "first date," "graduation" or "dream holiday" — then assemble digital looks for each other. Finish by posing together for an animated magazine cover.

Nostalgia	Paper dolls and childhood dress-up
Tenant customization	Real collection items, accessories, colours and editorial backgrounds
Keepsake	A **personalized cover** featuring both visitors
Commercial bridge	Save the featured items and **find them in the nearby store**

A **stylized collage**, not perfectly accurate virtual fitting — keeps the concept feasible

A17: 2F: A Pose Battle that is Physical, Watchable, and Very Fashion

CENTRAL PATTANA

2F: Inter & Local Hype Fashion

The Activity

You and your friend face three quick rounds:

1 **Match the pose:** recreate a campaign-inspired silhouette

2 **Switch the mood:** respond to "streetwear cover" or "paparazzi caught you"

3 **Your signature pose:** freestyle together for the final capture

Tenant customization	Brands supply campaign poses, collection-inspired backgrounds and digital magazine frames
Nostalgia	Childhood freeze games and dress-up — **subtle,** not a retro aesthetic
Keepsake	A **three-frame fashion editorial** or short pose-transition video with your names
Repeat hook	Rotating campaign challenges and new duo poses
Commercial bridge	"Explore the collection behind this challenge," with nearby store directions

AI never judges who looks like the "best model": score pose-matching and timing in round 1; freestyle stays **unranked** or friends pick a favourite

A18: 4F: 2 Friends, 1 Giant Keyboard

CENTRAL PATTANA

4F: Technology & Financials

The Activity

Share a **giant keyboard** and type a short, funny phrase before time runs out. Each player controls **one half**, so you have to coordinate — **"You do the A!"** Mistakes trigger playful animations.

Nostalgia	Early computer games and retro chat-window graphics
Tenant customization	Tech brands change keyboard lighting, sound effects, backgrounds and phrase packs
Personalization	Your names appear in the challenge and final result
Keepsake	A short **reaction clip** with your time and accuracy
Repeat hook	New phrases, harder rounds and a **rematch with different friends**

A19: 5F: A Playful Drawing Competition

CENTRAL PATTANA

5F: Creative & Wellness Lifestyle

Tenant fit: KOMO Wellness lists a 5F Beacon Zone location; **SLC** lists a 5F clinic

The Activity

You and Ploy draw **flowers, clouds or imaginary creatures** on two small touch panels. Your drawings **bloom together** on the pillar screen; a gentle **coordinated hand movement** makes the garden grow.

Nostalgia	Doodling in school notebooks and colouring together
Tenant customization	Wellness partners choose calming visual themes; creative partners provide drawing prompts and colour palettes
Keepsake	A short animation of your **shared garden,** signed with your names
Repeat hook	Seasonal gardens and new creative prompts

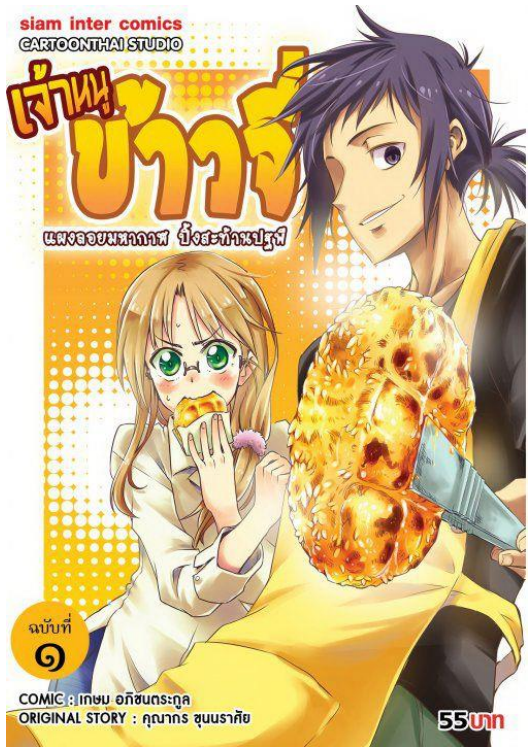

Positioned as a **playful pause** — not a medical assessment or a claim that it treats stress

A20: 6F: Turn “We Couldn’t Decide What to Eat” Into Your Own Comic

CENTRAL PATTANA

6F: Feed Destination & Lifestyle Discovery

Tenant fit: Kinokuniya (books, manga, stationery) is on 6F[1]; CPN lists **Daisen** and **Nua Tair PLUS** on 6F[2]

The Activity

Become characters in a **three-panel comic**: “We couldn’t decide what to eat.” Pick expressions, add your own **speech bubbles** and choose a **food-themed ending**.

Nostalgia	Reading comics, doodling stories and imaginary adventures
Tenant customization	Restaurants contribute dish illustrations; the bookstore contributes original or licensed story themes
Keepsake	Your **personalized comic strip**
Commercial bridge	Final panel gives directions to **the real dish** or the relevant book section

Source: [1] Kinokuniya Thailand store list; [2] Central Pattana dining guide

A21: 7F: Pretend Restaurant, Played as a 2-player Rush

CENTRAL PATTANA

7F: Food World & Entertainment

The Activity

One player **selects virtual ingredients** while the other **assembles and serves dishes** before time runs out. Touch controls or small gestures — **no real food handling.**

Nostalgia	Childhood cooking games and playing pretend restaurant
Tenant customization	foodwOrld vendors supply signature dishes; cinema campaigns introduce licensed movie-themed rounds
Keepsake	A **"You & Your Friend's Kitchen"** highlight with your funniest mistake and final score
Commercial bridge	**"Try the real version"** points to the featured vendor
Repeat hook	New menus, difficulty levels and co-op roles

A22: The Groove: Friends Discover How They See Each Other

CENTRAL PATTANA

Groove: Feed Destination & Lifestyle Discovery

The Activity

Stand side by side and **secretly answer five playful prompts** on your phones; the pillar screen reveals both answers together: "Our after-school stop: snacks, games or karaoke?" · "Who would survive without their phone?" · "Who's most likely to turn coffee into a three-hour conversation?"

Matches build your **"Same Brain" score;** differences trigger funny reactions. **No answer is objectively correct.**

Nostalgia	Childhood friendship quizzes and school-yearbook questions, updated with your own memories
Tenant customization	**VE/LA** café-themed round; dining tenants contribute food dilemmas — keep most questions about the friends, with **one optional tenant-linked final prompt**
Keepsake	Consented highlight of your funniest reveal: **"You + Friend: 4/5 same brain"**
Repeat hook	Rotating question packs — school days, first-job life, travel buddies — and play with different people

A23: Validating Public-Space Interactive Engagement (Wang et al.)

CENTRAL PATTANA

Study Overview

Objective
Test whether motion-controlled games can attract attention and engage people in public spaces

Methodology
Kinect-based game in 4 public locations, incl. a shopping mall; observations + questionnaires

Sample
105 survey responses, including 77 players

Contexts
Waterpark, university campus, movie theater, shopping mall

Strongest Findings

88% found **multiplayer** more fun

91% said it drew **more attention than a poster**

65% reported becoming **immersed** in the game

76–104 s average gameplay duration across test sites

Observed insights (from the study)

- Attracted attention and tempted passers-by's curiosity
- Participants were comfortable playing in public
- Children and teens in groups were most active

Implications

- Short, **low-commitment** interactions can still generate **strong engagement**
- Multiplayer play **lowers social barriers** and makes participation feel natural
- Games can **enhance the outing** without a long time commitment
- Playful installations can make existing mall visits **more social and memorable**

Interactive, multiplayer installations can turn **passive foot traffic into active social engagement,** supporting mOments' role in elevating everyday mall visits

Source: Wang et al. (2015), motion-controlled (Kinect) interactive game field study across four public locations; n = 105 survey responses

A24: Uni/Young Adult Use Case

CENTRAL PATTANA

Budget-sensitive

69% of surveyed Thai Gen Z cited costs as a financial concern and major deterrent. **Free experiences lower the barrier** to trial.

Source: Krungsri Research

Spontaneity wins

79% of surveyed young adults value spontaneous or unpredictable experiences, making **no-booking interactions** especially attractive.

Source: Eventbrite

Play drives re-engagement

A **378-participant** retail field experiment found gamified in-store experiences increased hedonic value, which predicted **continued engagement** better than reward satisfaction.

Source: Journal of Retailing & Consumer Services, 2019

Example Use Case

A group of friends waiting for dinner or browsing between stores discovers a quick interactive challenge, plays for **60–90 seconds**, saves a result and **shares it in the group chat.**

Design Implications for mOments

- **Free** and easy to join
- **Multiplayer** or side-by-side
- Placed near **food, fashion and transit flows**
- Generates a **shareable digital memory**

Source: Krungsri Research; Eventbrite; Harwood & Garry (2019), Journal of Retailing & Consumer Services

A25: Teens Use Case

CENTRAL PATTANA

Mall as social ground

A qualitative study of **23 adolescent "core kids"** found malls functioned as **neutral ground** where teens built a mutually supportive community.

Source: Lewis, Adolescence, 1989

Playful hanging out

Research on teenage girls in malls found hanging out was a **playful form of improvisation** and experiment, helping them **claim space as their own.**

Source: Skåry Ekoforth, Space and Society, 2016

Peer influence matters

A high-school consumer study found channel involvement and **socialization-agent communication** influenced shopping behaviours and future intentions.

Source: Journal of Retailing, 2006

Example Use Case

After school, a group of friends spots a **retro-style reflex game,** competes for **90 seconds,** records the winning score and keeps moving through the mall together.

Design Implications for mOments

- **Visible** and easy to read from a distance
- **Group-friendly** with a low skill floor
- **Competitive** but lighthearted
- Creates **social proof** and shareable bragging rights

Source: Lewis (1989), Adolescence; Skår (2016), Emotion, Space and Society; Journal of Retailing (2006)

A26: Couples Use Case

CENTRAL PATTANA

Novelty boosts closeness

Using surveys and **3 lab experiments,** Aron et al. found couples who completed a short **novel task together** reported greater gains in relationship quality than couples doing mundane tasks.

Source: Aron et al., JPSP, 2000

Play builds security

Shared novel activities increase satisfaction not only through excitement, but also through feelings of **security, trust and mutual reliance.**

Source: Cortes et al., JESP, 2020

Exciting beats pleasant

In a **10-week study of 53 married couples, exciting** shared activities produced higher satisfaction than pleasant activities or no special activity.

Source: Reissman, Aron & Bergen, 1993

Example use case

A couple on a date tries a **two-player coordination challenge** between dinner and shopping, gets a playful result and **saves a memory together.**

Design implications for mOments

- **Two-player cooperative** mechanics
- Quick and **low-pressure**
- Built-in **photo or memory capture**
- Placed near **dining and lifestyle zones**

Source: Aron et al. (2000), JPSP; Cortes et al. (2020), JESP; Reissman, Aron & Bergen (1993)w

A27: Families Use Case

CENTRAL PATTANA

Shared play improves interaction

A **4-week pilot randomized trial** with 32 parents found a shared-activities intervention increased **warmth,** positive reinforcement, positive mood and relationship quality.

Source: White et al., Appetite, 2024

Family time supports well-being

NordChild 2011 data on **1,461 children** aged 2–17 linked parents' activities together with their children to **better child health and well-being.**

Source: Berntsson & Ringsberg, 2014

Quality play matters

A systematic review found parent-child play is a key space for **connection,** emotional regulation and social-emotional development.

Source: Urke et al., Systematic Review, 2022

Example use case

A parent and child stop at a **nostalgic matching game,** play one round together and turn waiting time into a **family moment** rather than dead time.

Design implications for mOments

- **Simple rules** across ages
- **2–4 player** participation
- **Short rounds** that fit family pacing
- Encourages **collaboration,** not just watching

Source: White et al. (2024), Appetite; Berntsson & Ringsberg (2014); Urke et al. (2022)

A28: Older Visitors Use Case

CENTRAL PATTANA

Reminiscence works

A meta-analysis of **15 controlled studies** found reminiscence interventions had an overall **effect size of 0.54** on life satisfaction and emotional well-being in older adults.

Source: Bohlmeijer et al., 2007

Evidence at scale

A later meta-analysis of **31 studies** involving **1,829 older adults** found reminiscence-based interventions improved life satisfaction and reduced depressive symptoms.

Source: Shi et al., 2021

Play supports connection

Research on older-adult play in public space argues play can cultivate **relationships, social connection** and community cohesion in later life.

Source: Hartt, Cities, 2024

Example use case

An older visitor encounters a **memory-themed puzzle** or retro interaction, smiles at the reference and joins in **alone or with family** at a comfortable pace.

Design implications for mOments

- **Nostalgic cues** and familiar references
- Gentle, **optional** participation
- **Seated or standing** accessibility
- Rewards **reflection,** not just speed

Source: Bohlmeijer et al. (2007); Shi et al. (2021); Hartt (2024), Cities

A29: centralwOrld Right to Win

CENTRAL PATTANA

What makes centralwOrld different

Flagship scale & visibility
~50M annual visits and roughly **150,000 daily visitors** give sponsors unmatched exposure in the heart of Bangkok

Occasion density
Shopping, dining, events, entertainment, work and social meetups **already happen in one destination**

Sponsor magnetism
As a flagship, centralwOrld can attract **brand budgets, launch activations** and co-funded experiential content

Tenant & partner ecosystem
A dense tenant mix plus existing event partnerships make it easier to turn experiences into **surrounding spend**

Digital & loyalty layer
Central X and The 1 provide a base to extend physical moments through rewards, registration and memory-based engagement

Why it outperforms the average mall

	centralwOrld	Average mall
Sponsorship pull	●●●●○	●●○○○
Built-in traffic	●●●●○	●●○○○
Occasion diversity	●●●●○	●●○○○
Tenant spillover potential	●●●●○	●●○○○
Ability to build a signature experience	●●●●○	●●○○○

Team qualitative assessment (5 = strongest), not measured data

A mall that hosts many occasions at once is harder to replace with any single alternative, but each occasion on its own is not.

A30: mOments makes mall exploration rewarding through playful encounters and unexpected discoveries

CENTRAL PATTANA

Strategic objective: Give visitors reasons to explore **beyond their usual route**

ENJOY THE EXPLORATION

The journey becomes part of the experience

"What might we find on the next floor?"

EVIDENCE

A survey of **775 second-hand shoppers** associated treasure-hunting attitudes and serendipity with **spontaneous, playful and creative** consumption[1]

mOments: Different **floor-specific activities** give visitors something enjoyable to encounter beyond their original destination

ENJOY THE UNEXPECTED FIND

A positive surprise can make it feel more rewarding

"We weren't looking for this, but we're glad we found it."

EVIDENCE

Experiments found that **positive, unexpected encounters** attributed partly to chance can increase **enjoyment, satisfaction and perceived meaningfulness**[2]

mOments: Let visitors **spontaneously encounter** a new challenge, collaboration or relevant tenant, not only follow a set itinerary

How we design for discovery

Spread the encounters
Distinct mOments across selected floors

Refresh what visitors find
Rotate challenges and tenant collaborations

Keep exploration optional
Offer suggestions without forcing a route

Visitors don't just walk to their destination: they **find enjoyable reasons to explore** along the way

Source: [1] Second-hand shopping study, RAE (2024); [2] Kim et al., Journal of Marketing (2021); mOments application: team analysis

Examples

but do not establish it as a market rate.

Relevant example	Published price	What the buyer receives	Comparison with mOments
Thailand LAB 2026, Bangkok: **digital kiosk sponsorship**	**THB 17,500 for 3 days**	A 15-second advertising spot on a digital kiosk, sharing the screen with other advertisers.	Actual sponsorship inventory, but a specialist trade-show audience rather than mall shoppers.
APOSTROPHY'S FrameVerse: **branded video booth**	**THB 18,900 for 1–4 hours; THB 28,900 for 8–12 hours**	An interactive video experience using customized frames for brand activations and mall events.	Close to your branded, shareable experience. However, these are event service fees, not monthly sponsorship prices. Glambot & Luxur...
BOOTH+: **360° video booth**	**THB 39,000 for 8 hours**	Custom frame and logo, unlimited clips, QR delivery, online gallery and two attendants.	Similar marketing output. Staffing and equipment rental contribute to the price. BOOTH+
Siam Paragon advertising through Jindamanee	**THB 189,500 for 15 days**	Advertising across a package described as **104 + 1 in-mall media units**.	A relevant competing use of the brand's budget, offering much broader passive exposure. jindamanee.co.th

IRR Overview

CENTRAL PATTANA

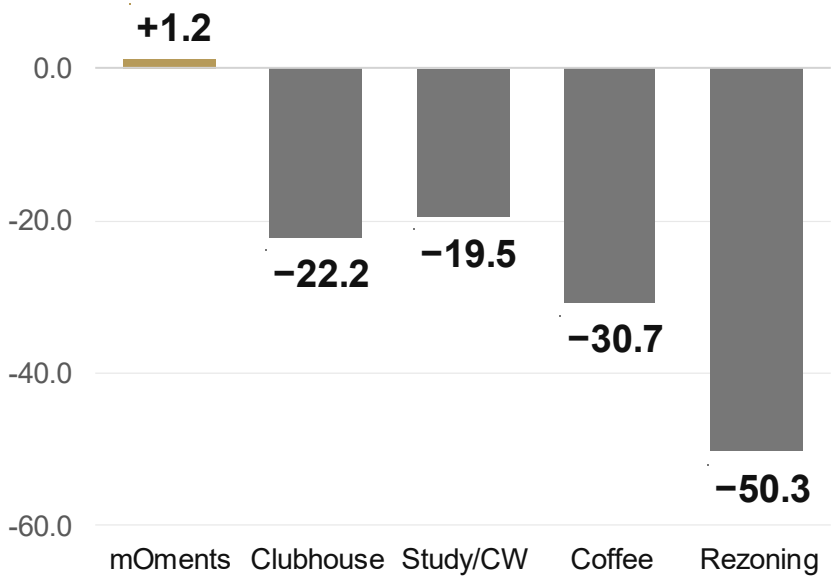

Investment and reported returns

Project	Horizon	Capex THB m	Reported IRR	Cash payback
mOments	3 years	6.3	30.9%	2.3 years
Clubhouse	3 years	10.0	N/M	Not reached
Study / co-working	3 years	10.0	N/M	Not reached
Coffee shop	3 years	7.0	N/M	Not reached
Rezoning	5 years	217.0	5.3%	Not reached

N/M: all venue cash flows are negative. Payback is assessed over the model horizon.

NPV at 10%

THB million, including source terminal values

mOments has positive NPV in the current source model
