CLIO

Expanding through Product Led Growth

Vision Consulting

Executive Summary | CHA can address overreliance on government funding and lack of technical expertise through Access and Activate strategy

Question

How can Clio implement a product led growth strategy without disrupting current customers?

Solution

D.R.I.V.E.

A PLG strategy that engages customers through product previews that trigger from specific behaviors, as well as a passive engagement system

KPIs

$55.6K	**2.96x**	**$901M**
LTV per customer	ROI	Total 5Y Revenue Generated

Overview | Clio is well positioned to utilize its competencies to implement PLG

Clio's Current Situation

- Clio is a **leading platform** for small and mid-sized law firms, with multiple products supporting different parts of the legal workflow[1]
- The company is **shifting toward a product-led growth (PLG)** strategy to drive adoption of additional products through the product itself

Clio **is well-positioned** but must find a way to **integrate PLG into the system**

Goals

1. **Implement PLG** to drive adoption of additional products
2. Keep user experience **relevant and non-disruptive**

Core Competencies

Strong Product Suite

Legal Workflow Knowledge

Large Customer Base

Sources: [1]Case

Overview | Clio's target customer is a young, prioritizes efficiency, unaware of potential job solutions, and afraid to take any action what would commit the firm

Rachel

Age 26, Associate

01 Young associate of a small firm
90% of Clio customers are firms with <50 employees, consisting of associates and partners[1]

02 Primary goal: Workflow efficiency and immediate task resolution
57% of Gen Z already use generative AI in their day-to-day work to some extent, showing that young workers place value in efficiency[2]

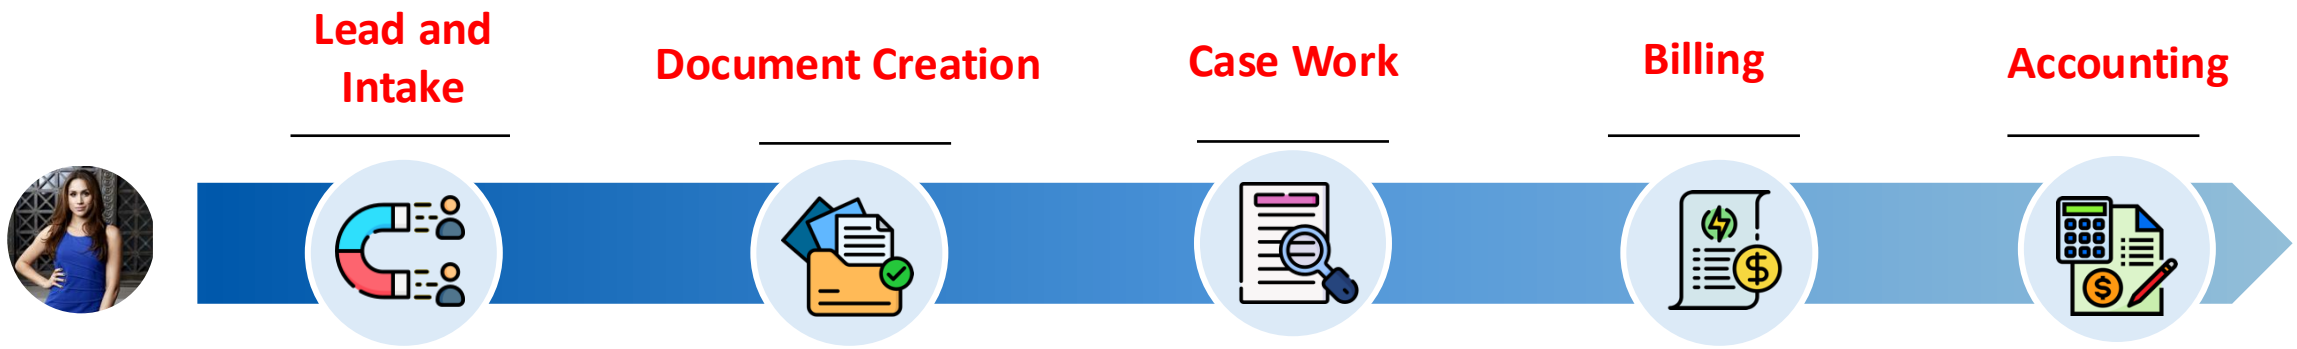

03 Unaware of solutions to challenges at her job
Clio does not currently promote or showcase their products where their users are most active[3]

04 Afraid to commit the firm to newly discovered products
64% of employees delay taking action during change initiatives because they wait for leadership direction instead of proactively engaging in the process[4]

Source: 1. ***Enlyft*** *"Companies using Clio"*, 2. **Novoresume "**96 Gen Z Workplace Statistics & Trends [for 2026]", 3. **Case**, 4. **Pollack** "Leadership & Employee Engagement"

Overview | All engagements across firm types follow a 5 step workflow

All engagements, across firm types, follow a five-step workflow: lead and intake, document creation, case work, billing, and accounting

Clio's Opportunity

Clio Grow	Clio Draft	Clio Duo	Clio Payments	Clio Accounting
Lead and Intake	Document Creation	Case Work	Billing	Accounting

Your current customers are **not aware that these solutions exist**, and how these products can **optimize their current work**

Overview | Clio faces challenges of having a ineffective PLG implementation through unclear value propositions, excessive notifications, and firm wide activation concerns

Benefits of PLG

Drives Awareness
Product-led growth uses your product as the primary driver of customer acquisition, activation, retention, and expansion[1]

Reduces Friction in User Journey
The core philosophy centers on removing friction from the customer journey by offering access to the product immediately[2]

Increases Adoption and Activation
PLG meets customer preferences by allowing them to evaluate without waiting for a sales demo, driving adoption[3]

Challenges of Implementation

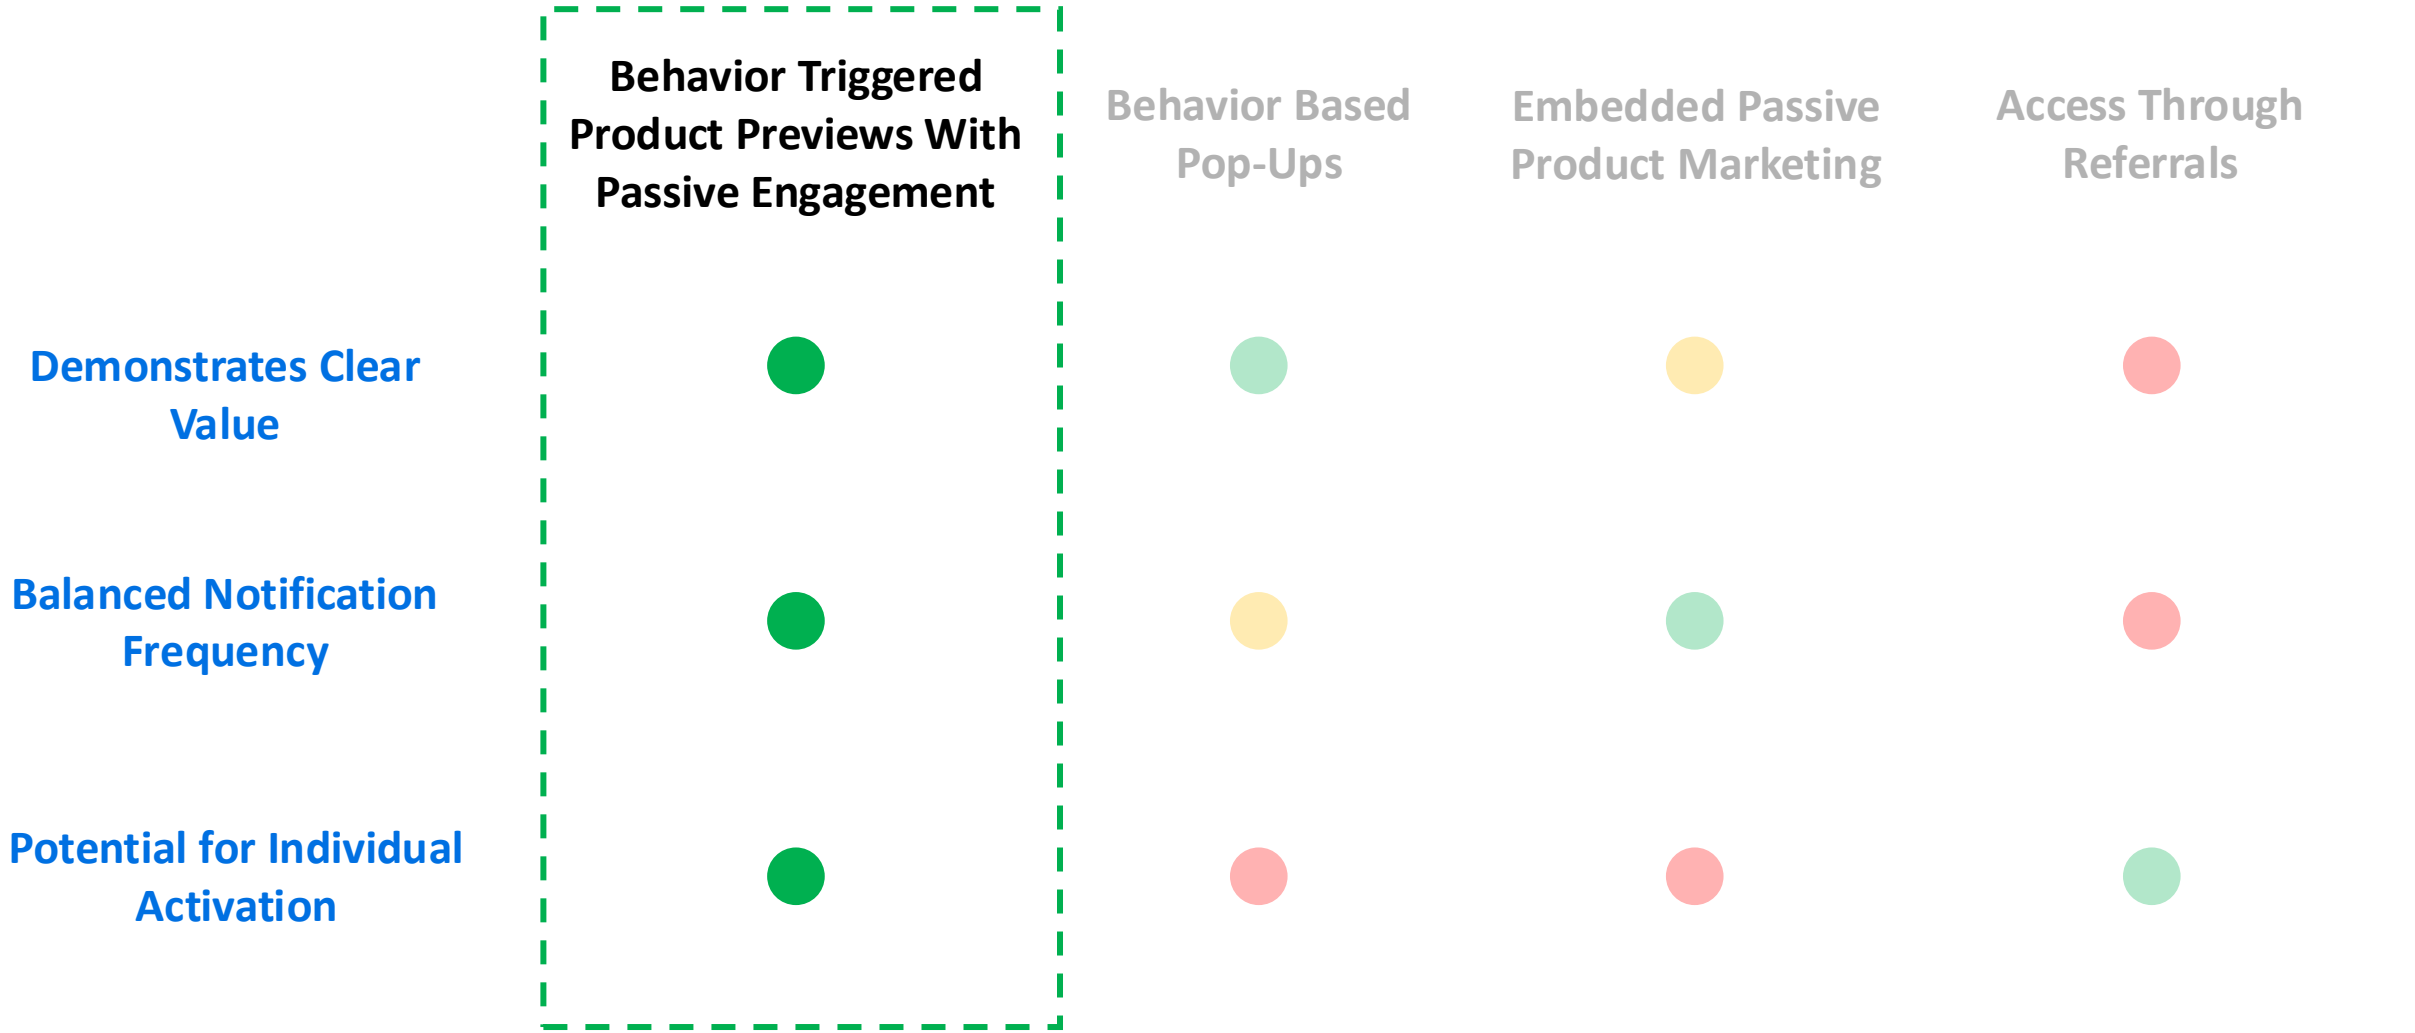

1. **Unclear Value Proposition**
Users expect to understand a product's value within minutes, otherwise they move on[4]

2. **Excessive Notifications**
46% unsubscribing after seeing the same promotions repeatedly[5]

3. **Firm-Wide Activation Concerns**
64% of employees delay taking action during change initiatives because they wait for leadership direction[6]

Source: 1. ***Signals & Stories*** *"What is product-led growth? Complete guide & analytics that drive success."*, 2. **Atlassian "What is product-led growth?"**, 3. **ProductLed** '14 Benefits of Product-Led Growth in SaaS, 4. **Weft "**How to Achieve Product-Led Growth in 2026? The Right Strategies for a Successful Product" 5. **Optimove "**Optimove Insights Marketing Fatigue Report 2026", 6. **Pollack** "Leadership & Employee Engagement"

Overview | A strategy of behavior triggered product previews with passive engagement best satisfies the criteria for a successful PLG implementation

D.R.I.V.E. | The D.R.I.V.E. PLG strategy involves a 5 step detect, recommend, implement, validate, and expand plan

Detect

Identify workflow inefficiencies and trigger contextual tab previews

Recommend

Offer a 30-day matter-level free trial so client can test with minimal commitment

Support firm-wide adoption through interactive demos and customer success team

Expand

Repeat process across other stages of the legal workflow to drive additional adoption

Generate a summary notification and notify decision-makers to commit subscription

D.R.I.V.E. | The 5-step process starts with contextual product discovery

Detect

Identify workflow inefficiencies and trigger contextual tab previews

Recommend

Implement

Validate

Expand

D.R.I.V.E. | Detecting workflow inefficiencies will allow Clio to surface the right tool

Detect

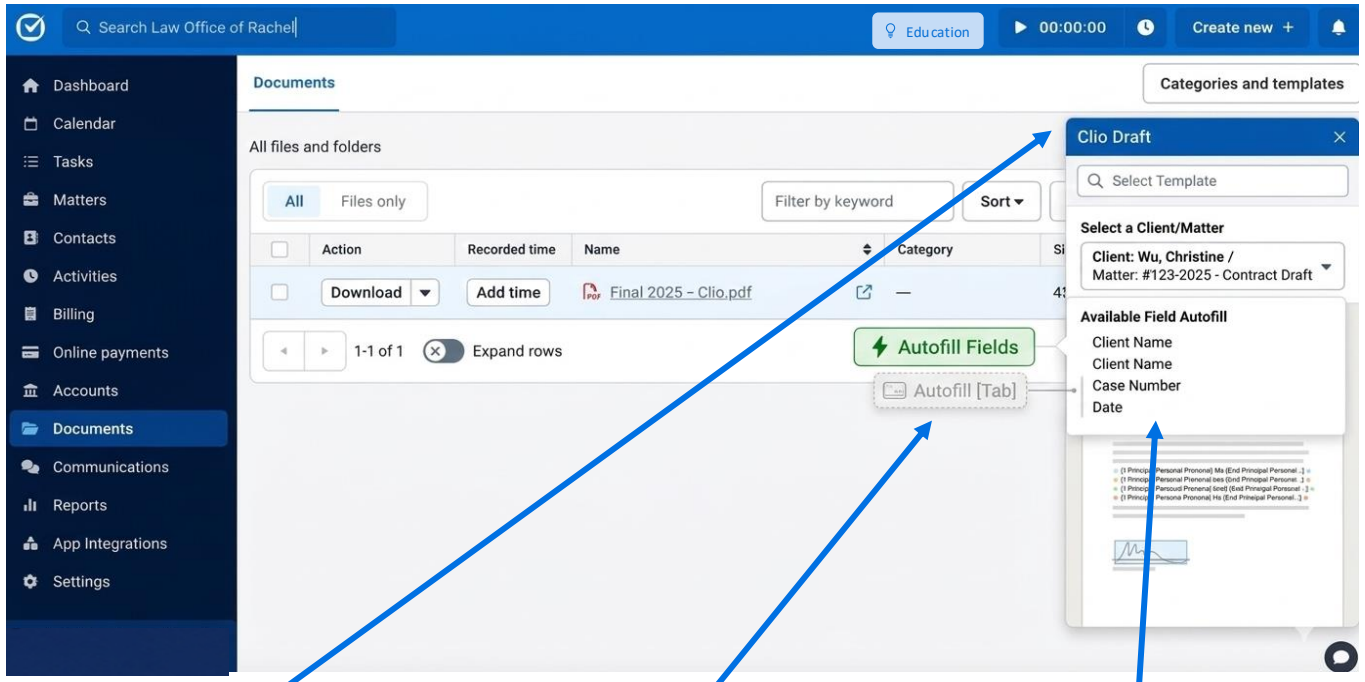

Detection Requirements

Monitor Benchmark	Monitor individual workflow efficiency relative to the company average
Trigger Autofill	Trigger a recommendation when a user performs below the benchmark

Clio Draft

When Rachel spends 20% longer than average drafting a template, Clio prompts Clio Draft automation

Prompt appears directly within the drafting workflow in Clio Manage

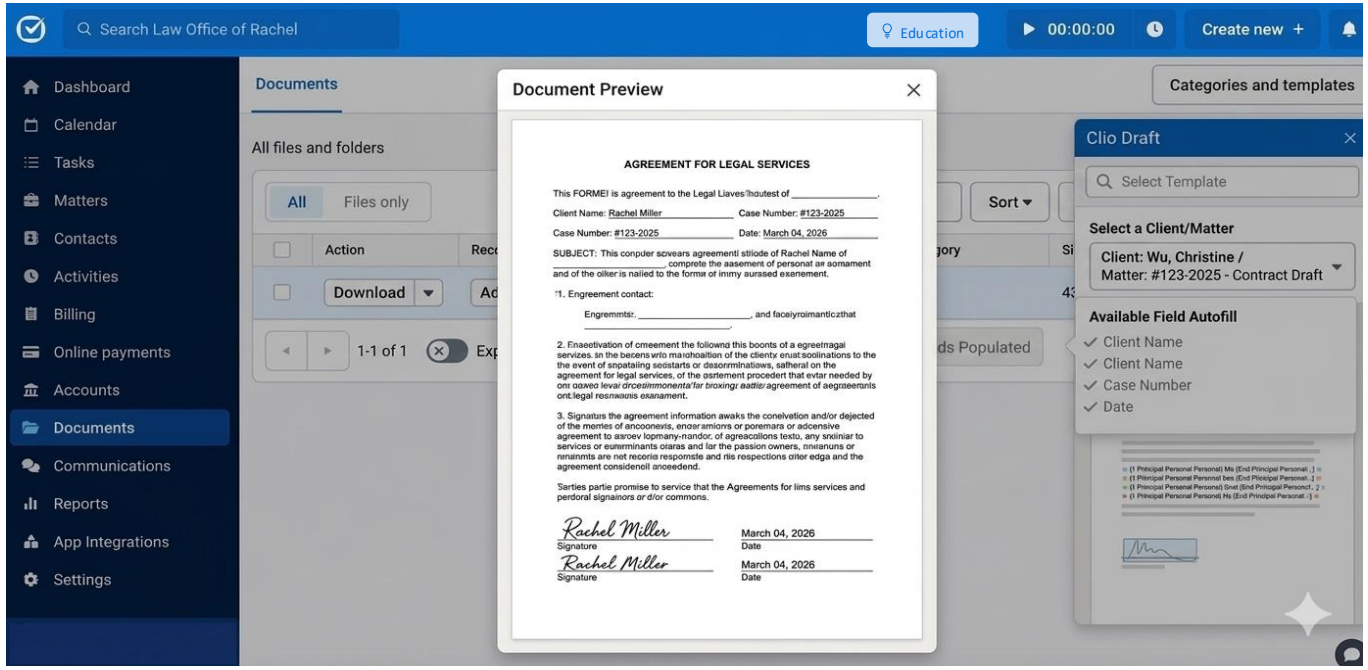

Seamless integration with one-click [Tab] autofill

Feature auto-populates document fields using matter data

Source: [1]Image generated by Nana Banana

Detect

After pressing [Tab]…

- **Saves Time:** Document auto-fills in seconds instead of manual drafting
- **Reduces Repetitive Work:** No need to re-enter the same client information
- **Keeps Workflow Moving:** Completes tasks faster without leaving dashboard

Accelerate Time-to-Value within Rachel's day-to-day workflow so she experiences the product's value **immediately**, with **minimal effort or commitment**

Source: [1]Image generated by Nana Banana

D.R.I.V.E. | After the initial introduction, Clio will recommend a free trial to clients

Detect

Recommend

Offer a 30-day matter-level free trial so client can test with minimal commitment

Implement

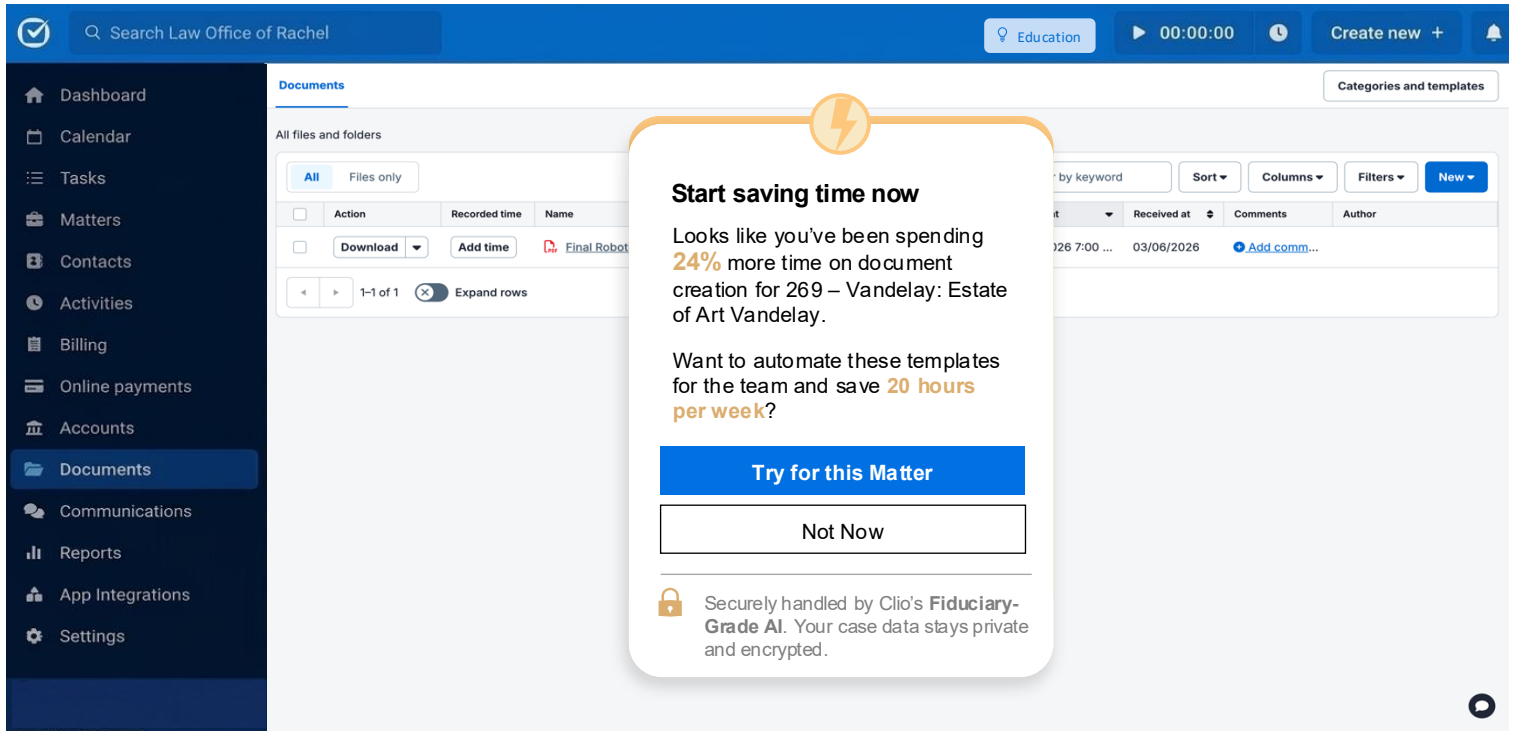

Validate

Expand

D.R.I.V.E. | Personalized notifications to encourage free trials of products for the matter

Recommend

Opting In

Puts trust and autonomy at the forefront of your relationship with legal personas[2]

Serves as a clear signal that user identifies the value of the product from the preview

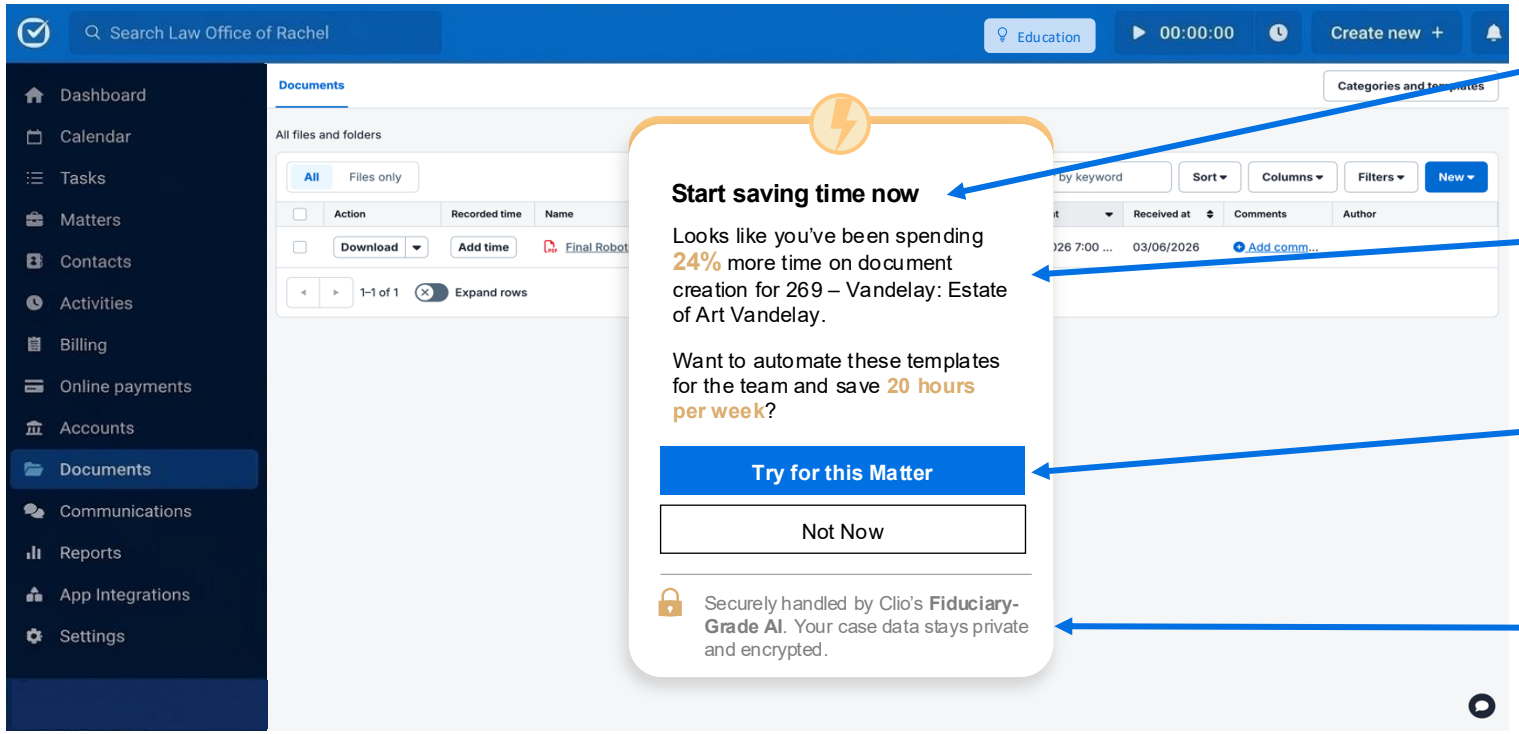

Sets up for a strategic cooldown phase and preserve ability to offer it again when pain point is urgent

Immediate action prompt at moment of pain point, encouraging Rachel to try the product through **a low commitment and low risk** free trial

Source: [1] Image generated by ChatGPT, [2]American Bar Association

D.R.I.V.E. | Personalized notifications to encourage free trials of products for the matter

Recommend

Build a psychological attachment to the premium features before the trial ends

Quantify Rachel's mental fatigue with digestible KPIs

Neutralize social and emotional friction by highlighting the small, controlled group

Overcome Rachel's inherent risk aversion by emphasizing GDPR-compliance that keeps sensitive data safe

Immediate action prompt at moment of pain point, encouraging Rachel to try the product through **a low commitment and low risk** free trial

Source: [1] Image generated by ChatGPT

Recommend

Features of Free Trial

30-day period for each user[1], 1 trial per matter

Can only be accessed by those working in that matter unit

Key Challenge
Maximizing engagement and usage during trial period

Introduce Rachel to **the features and value propositions** of the product **without excessive spamming** of notifications

Source: [1] Amplitude (Appendix), [2] OpenView Investments

Recommend

Features of Free Trial

30-day period for each user[1], 1 trial per matter

Can only be accessed by those in the working in that matter unit

Key Challenge
Maximizing engagement and usage during trial period

Progressive Overload

slack

Difficulty

Post your first message

Start a thread

Create a channel

30% conversion rate without excessive badgering[2]

Prompts integrated within workflow to increase engagement and product stickiness and reliance

[Day 1] Generate a completed court form

[Day 7] Suggest automating data entry from client data

[Day 16] Introduce template building tools

Introduce Rachel to **the features and value propositions** of the product **without excessive spamming** of notifications

Source: [1] Amplitude (Appendix), [2] OpenView

D.R.I.V.E. | Clio can use trial results to prove ROI and drive purchase decision

Detect

Recommend

Implement

Validate

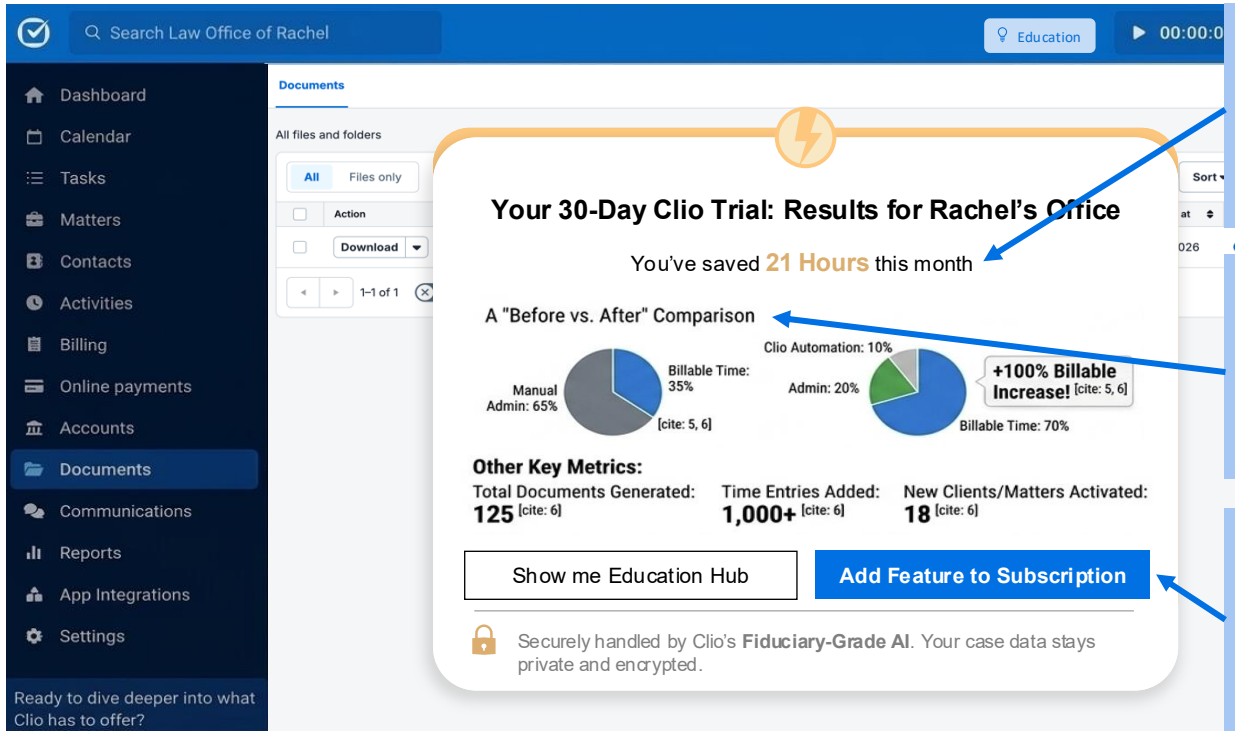

Expand

Generate a summary notification and notify decision-makers to commit subscription

D.R.I.V.E. | Decision-makers are notified of new feature value-add via summary

Implement

Quantify usage and productivity gains for immediate benefits

Dashboard summary to highlight feature gains from trial period

Prompt allows decision-makers to immediately opt-in on subscription

Sent to…

Paralegals and office users like Rachel

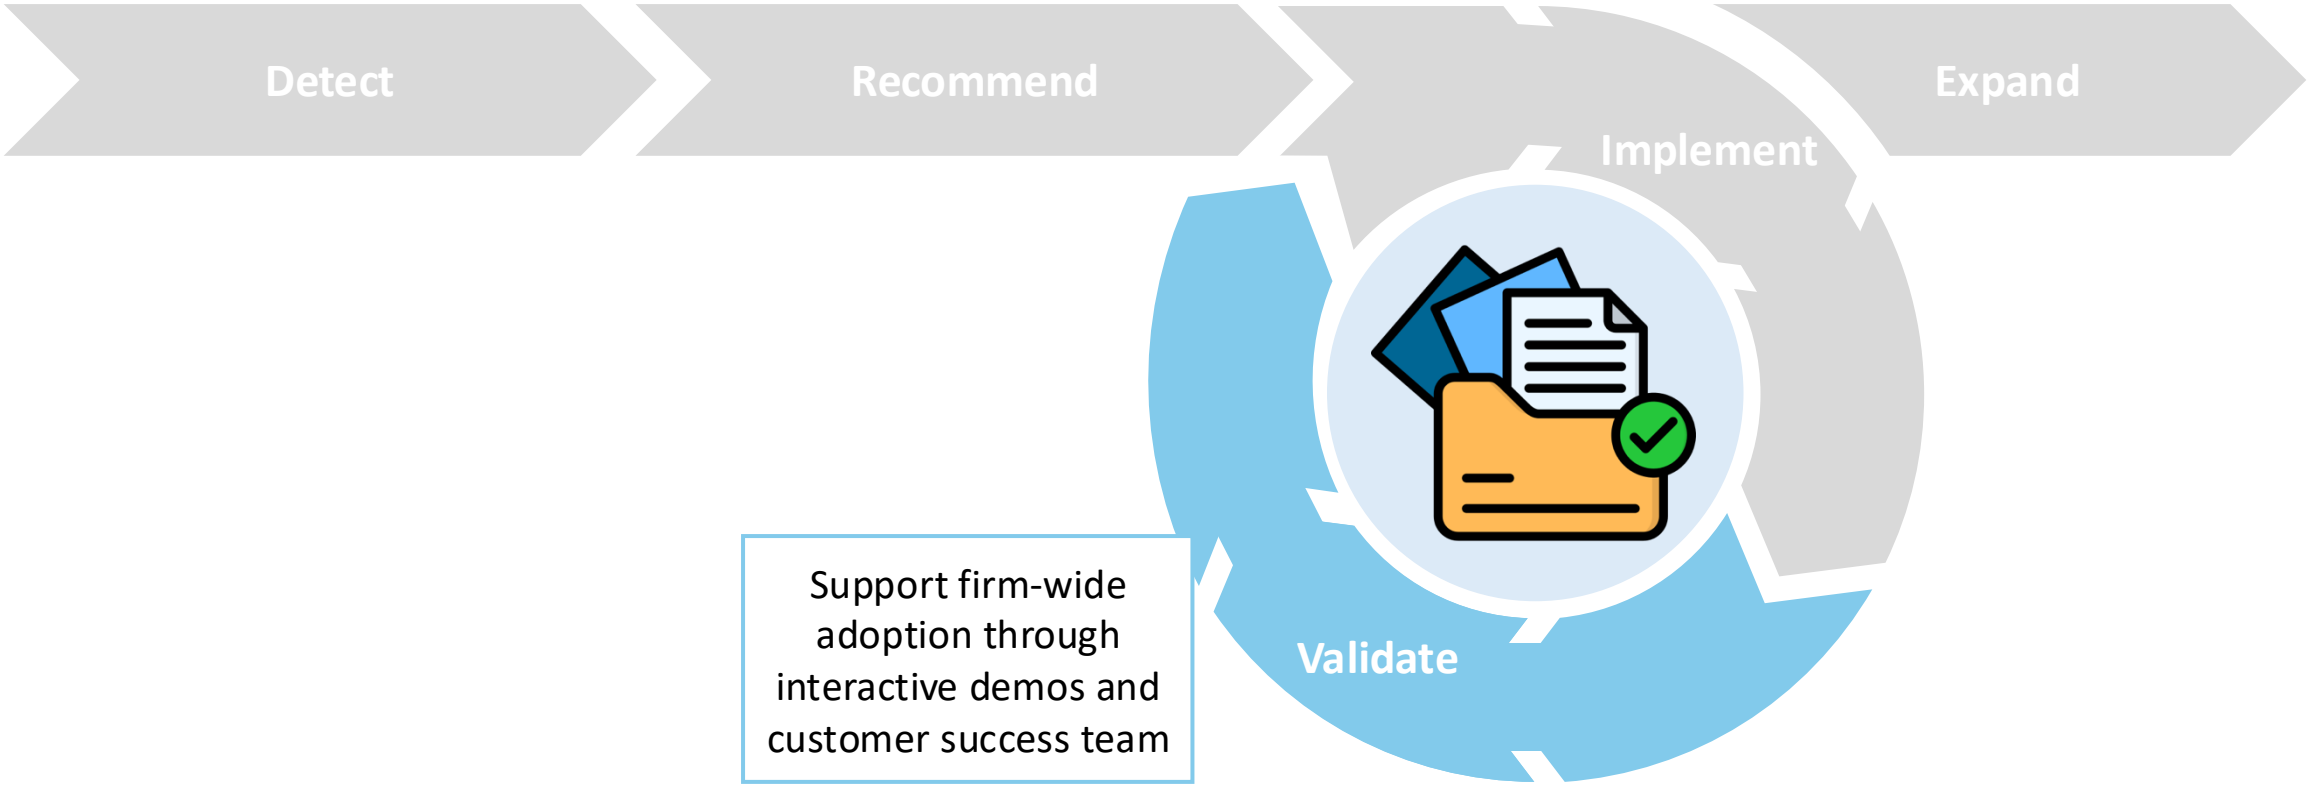

Decision-makers like Rachel's boss

As decision-makers see value add through **matter-level trials**, we **remove firm-wide activation pressure** from employees like Rachel

Source: [1]Image generated by Nana Banana

D.R.I.V.E. | Validate feature value with firm-wide adoption through guided onboarding

Support firm-wide adoption through interactive demos and customer success team

D.R.I.V.E. | Scaling firm-wide adoption will occur through guided onboarding and proactive support from customer success teams

Validate

Activate

Enable the feature across the firm and notify relevant users

Interactive demos boosts 450% adoption compared to videos[1]

Guide

Provide interactive demos and updates within daily usage

Effective, structured onboarding improves retention by 82%[2]

Reinforce

Send contextual tips and performance insights to build habits

Hands-on guidance reducing initial adoption barrier[2]

Customer Success Teams

1 Proactive Onboarding Support

Increase adoption by monitoring usage and answering questions

2 Human-Centric Loyalty

96% of customers say service quality drives brand loyalty[3]

3 Leverage Existing Strengths

Complements PLG activities with existing sales and customer activities

Validate

Expand

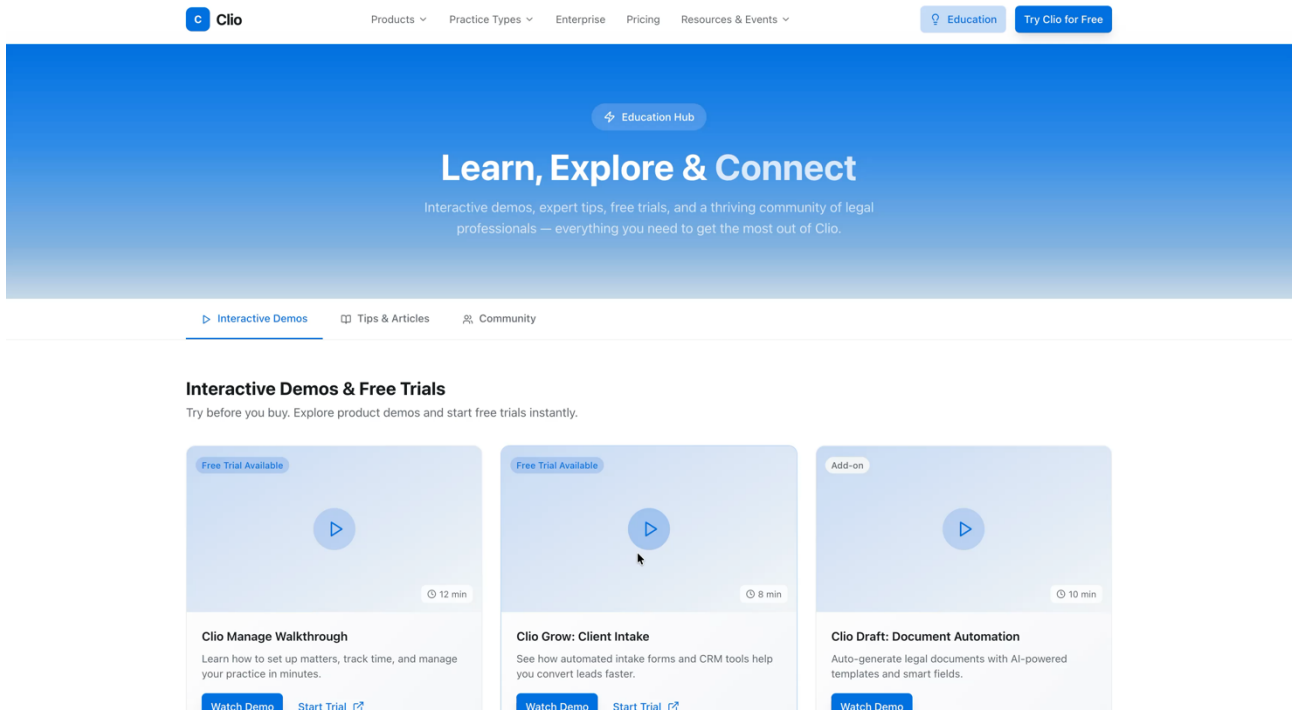

Repeat process across other stages of the legal workflow to drive additional adoption

D.R.I.V.E. | An education hub as a passive strategy to encourage exploration of new add-ons, maximizing the value of Clio

Expand

Education

Interactive Demos
Segmented interactive demonstrations in your own workspace with one-click activated trials

Featured Articles
Accessible guide and playbook, demonstrating how to use Clio to maximize efficiency

Community
Can act as a referral system and transform users to "ambassadors" of the product

Passive strategy **captures intent outside of the workflow**, allowing Rachel and the leadership team at her firm to **explore** new functions and **re-engage** with add-on features

Source: [1]Website generated by Lovable

D.R.I.V.E. | A 5-stage strategy of behavior triggered product previews with passive engagement will drive a successful PLG strategy

Detect

Identify workflow inefficiencies and trigger contextual tab previews

Recommend

Offer a 30-day matter-level free trial so client can test with minimal commitment

Implement

Validate

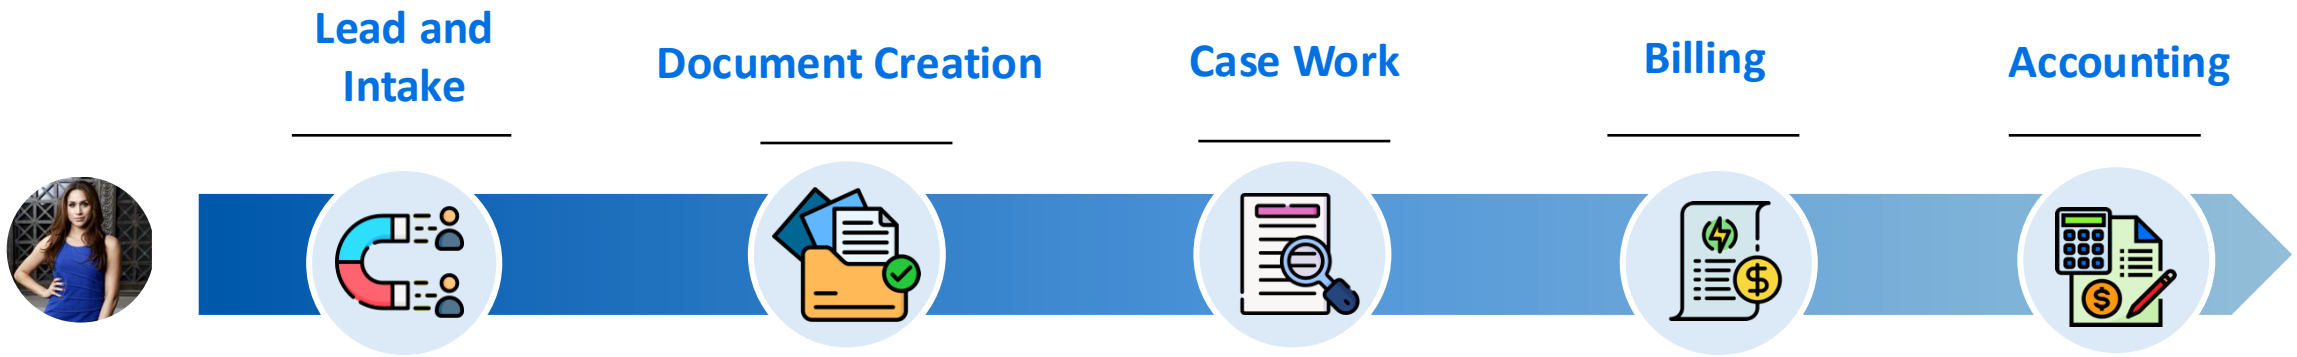

Support firm-wide adoption through interactive demos and customer success team

Expand

Repeat process across other stages of the legal workflow to drive additional adoption

Generate a summary notification and notify decision-makers to commit subscription

D.R.I.V.E. | D.R.I.V.E. can be replicated across Clio's products at different stages of the workflow

By applying a systematic experimentation framework to each stage of the legal workflow, Clio can transform its system of behavior triggered product previews into a self-reinforcing expansion engine

03

IMPACT

Key metrics for success, cost and revenue projections, and next steps to implementation

Impact | To track the success of Clio Drive, these KPIs should be tracked

ROI

2.96x

By 2030

ARPA

$6.68K

By 2030

LTV per Client

$55.6K

By 2030

CAC

$435

Per client per additional add-on

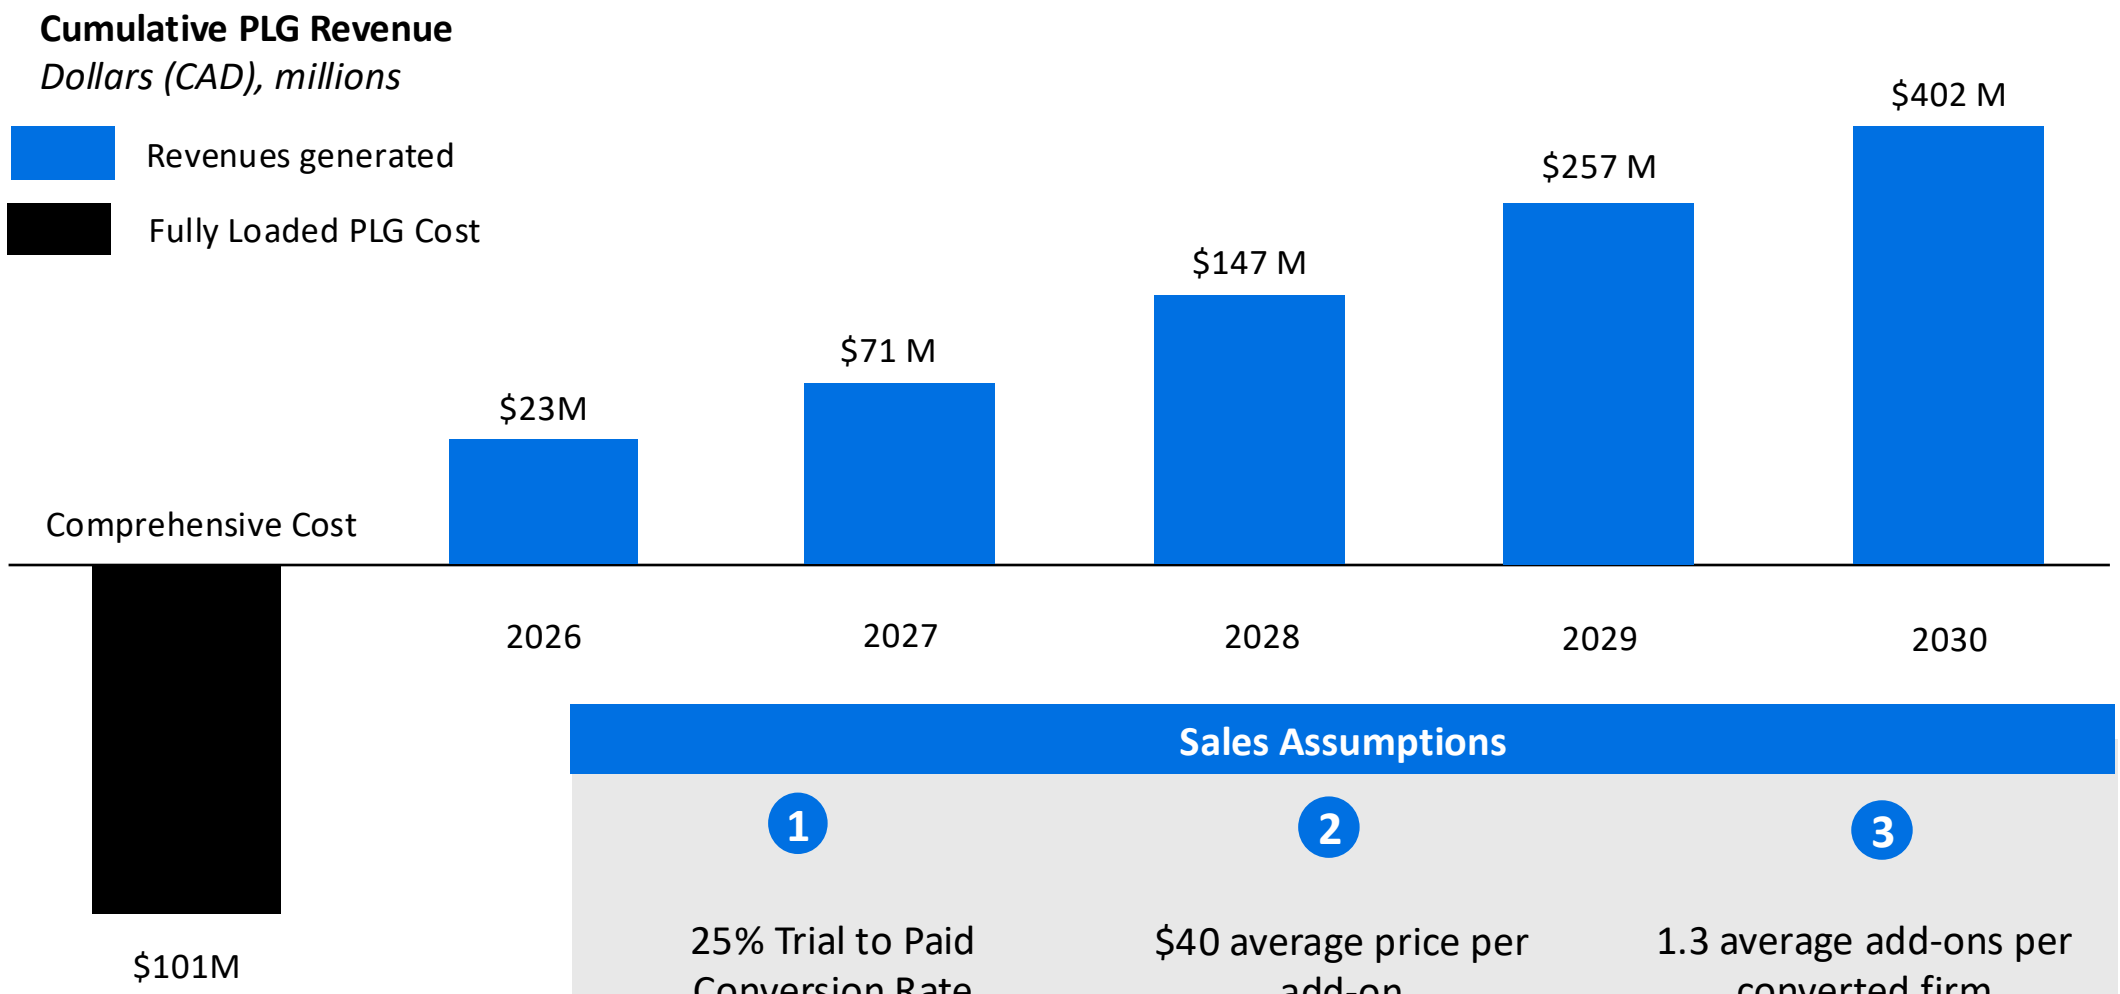

Virality

2.18

new referrals per converted user

Impact | With the implementation of DRIVE, Clio will be able to generate a summed cumulative 5-yr PLG revenue of $901M

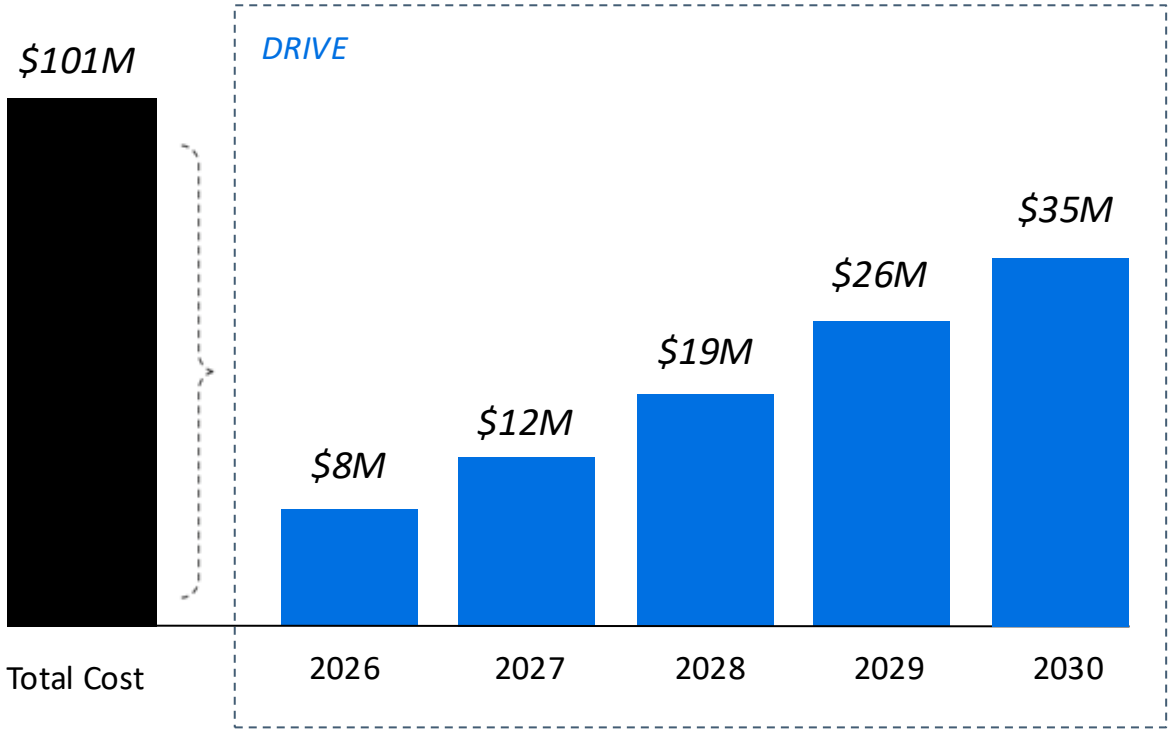

Sales Assumptions

1. 25% Trial to Paid Conversion Rate
2. $40 average price per add-on
3. 1.3 average add-ons per converted firm

Impact | The Drive strategy will generate a sum of ~$800M in profit over the 5 years

Project Costs

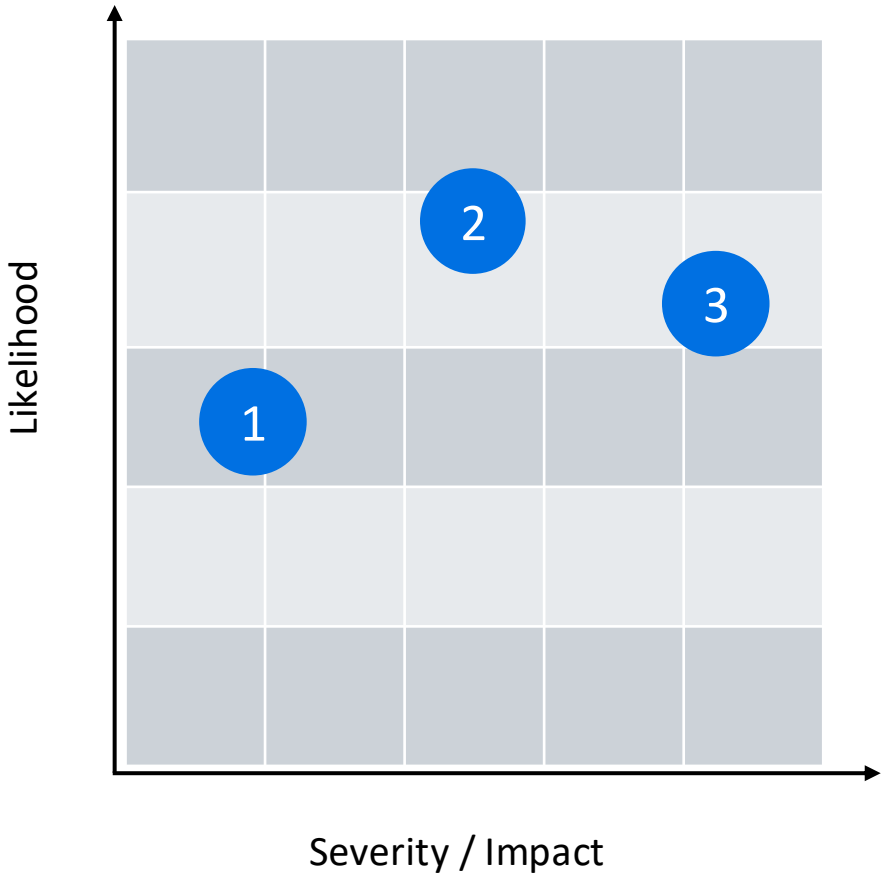

$1.4M Total Build Costs

~20% Of Add-On ARR for COGS

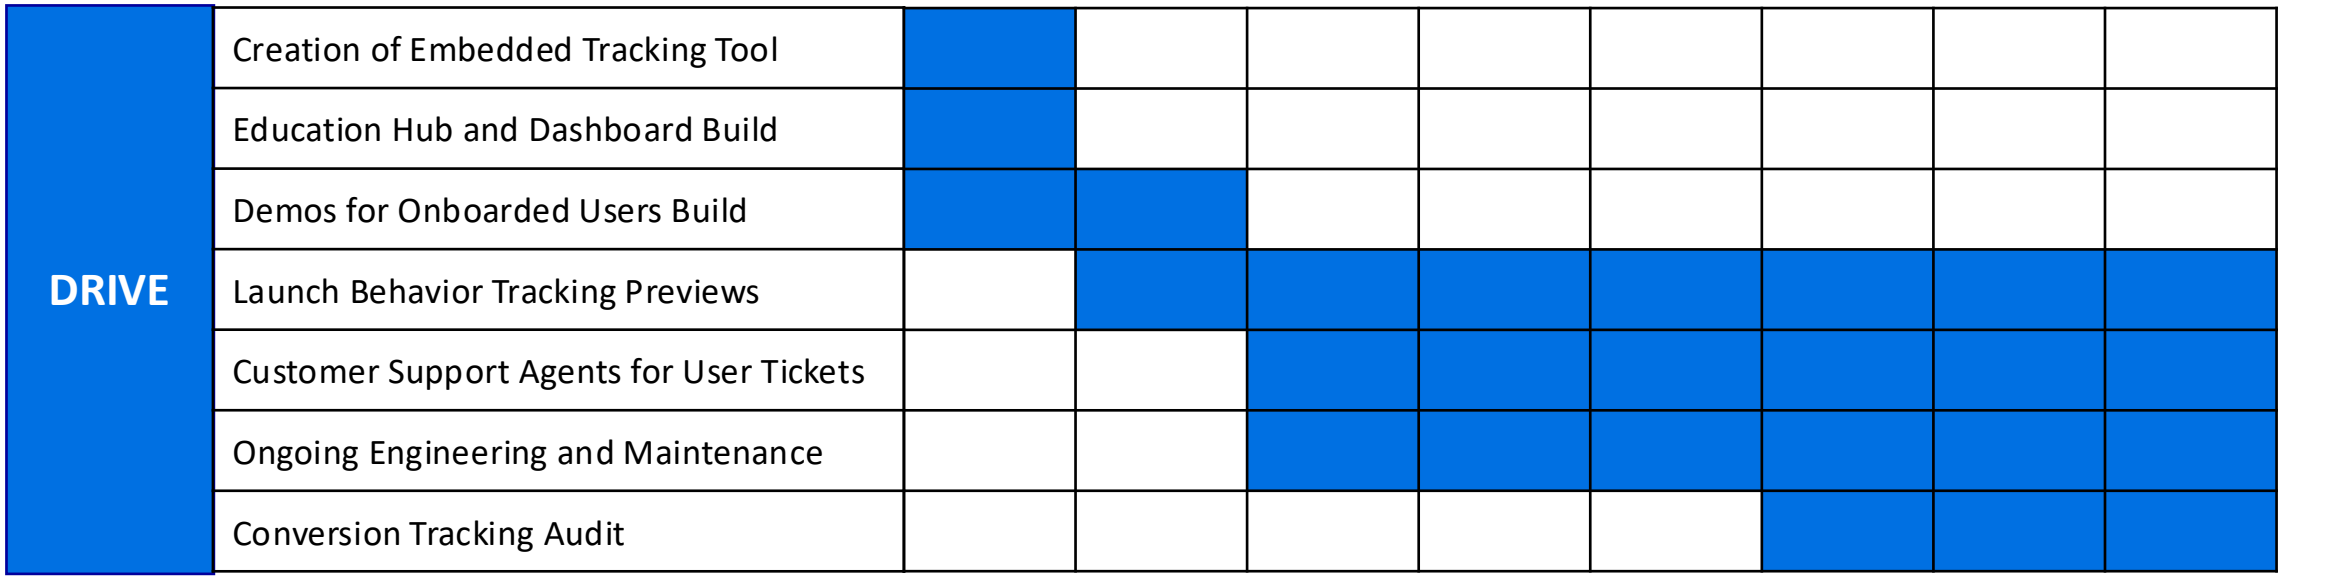

Key Cost Drivers

- One Time Build Costs
- Free Trial Operations Cost
- Add-On COGs
- Customer Success Team
- On-going Engineering and Maintenance
- G&A Overhead

	Risks	Mitigation
1	Notification Fatigue	Opt-In Trials triggered delivered when context rule has been met; cool down period for alerts
2	Low Trial-to-Paid Conversion	Focus on summary metrics for decision making and value reinforcement during trial period
3	User Trust & Adoption	Communicate clearly about privacy and data usage

Key Assignments

Immediate Next Steps

1. Hire Engineering Team and Train Customer Service Agents
2. Finalize Initial Behavior Trigger Thresholds
3. Determine Accurate Wording for Previews

Executive Summary | CHA can address overreliance on government funding and lack of technical expertise through Access and Activate strategy

Question

How can Clio implement a product led growth strategy without disrupting current customers?

Solution

D.R.I.V.E.

A PLG strategy that engages customers through product previews that trigger from specific behaviors, as well as a passive engagement system

KPIs

$55.6K	2.96x	$901M
LTV per customer	ROI	Total 5Y Revenue Generated

Appendix | Revenue Assumptions

Assumption	Value (Blue = Input)	Source / Notes
MARKET & CUSTOMER BASE		
Total Clio Customers – 2025 Baseline (Firms)	$150,000	*Clio Press Release, Nov 2025*
Est. % on EasyStart / Essentials / Advanced (add-on eligil	80.0%	*Complete plan already bundles add-ons; ~20% est. on Complete*
Avg. Users per Firm (billing unit)	8.0	*Clio has 1-10 users per firm*
Legal Practice Management Software Market CAGR	11.0%	*Yahoo Finance*
CLIO ACTUAL PRICING (per user / per month, annual billing)		
EasyStart Plan – $/user/month	$39	*Clio pricing page; clio.com/pricing*
Essentials Plan – $/user/month	$79	*Clio pricing page*
Advanced Plan – $/user/month	$109	*Clio pricing page*
Complete Plan – $/user/month (add-ons bundled)	$139	*Complete plan users already have Grow etc. – NOT PLG target*
ADD-ON PRICING (incremental per user per month on top of base plan)		
Clio Grow (CRM / Client Intake) – $/user/month	$49	*$49 standalone from ITQclick.com*
Clio Duo AI – $/user/month (est.)	$29	*Assumed pricing from similar products from FreshBooks/Xero*
Clio Accounting – $/user/month (est.)	$39	*Assumed pricing from similar products from FreshBooks/Xero*
Clio Draft / Document Automation – $/user/month (est.)	$25	*Draft(previously called Lawyay) heritage product; est. standalone price*
Avg Add-Ons Purchased per Converted Firm (Year 1)	1.3	*Most firms start with 1 (Grow); model grows to 1.8 by Y5*
Blended Avg Add-On Price per User/Month (weighted)	$40	*Avg of Grow $49, Duo $29, Acctg $39, Draft $25*
Annual Add-On ARPA Growth (pricing + upsell)	6.0%	*6% annual increase from price hikes + more users/add-ons per firm*

ACTIVE PATH – In-Workflow Trigger (Firms Seeing Preview)		
% Active Customers (workflow-trigger exposed)	70.0%	*Est. % with enough workflow activity to trigger previews*
% Who Click 'Preview' the Add-On	50.0%	*Less investment and allows customers to see potential benefits of add-ons*
% Preview Viewers Who Start 30-Day Trial	35.0%	*Incentive to use platform for 30 days on a matter*
% Trial → Paid Conversion (Active Path)	25.0%	*Opt-in Trial Convertion Rate for SaaS platforms*
PASSIVE PATH – Education Hub Dashboard		
% Passive Customers (Education Hub)	30.0%	*Non-workflow-active; receive hub emails and in-app prompts*
% Who Visit Education Hub	30.0%	*Individuals who are exploring/or heard about different add-ons*
% Hub Visitors Who Start 14-Day Trial	28.0%	*Lower intent than active path; avg SaaS sign-up 15-20%*
% Trial → Paid Conversion (Passive Path)	25.0%	*Opt-in Trial Convertion Rate for SaaS Platform*
RETENTION		
Annual Add-On Subscriber Churn Rate	12.0%	*B2B SaaS avg; legal software is important but premium pricing adds risk*

Appendix | Key decision-makers

Law Firm Persona Comparison

Persona Title	Primary Goal	GTM Motion Type	Value Drivers
Daily End-Users (Associates, Paralegals, Admins)	Workflow efficiency and immediate task resolution.	**Product-Led Growth (PLG)**: Bottom-up adoption via self-service and trials.	Reduced friction, "Aha Moments," and intuitive UI that requires zero training.
Economic Buyers (Managing Partners, CEOs, CFOs)	Long-term ROI, security compliance, and firm-wide scalability.	**Product-Led Sales (PLS)**: Top-down conversion informed by existing usage data.	Value realization, Negative Net-Revenue Churn, and enterprise-wide solutions.

Quadrant	Customer Profile	Intervention Playbook
Champions	High Adoption / High Engagement.	**Leverage & Expand**: Use for case studies; trigger expansion workflows for premium seat upgrades.
Fake Advocates	Low Adoption / High Engagement.	**Educate & Drive Adoption**: This is a value-delivery problem, not a relationship problem. Deploy targeted training to move beyond brand affinity into actual feature usage.
Silent Workhorses	High Adoption / Low Engagement.	**Engage & Reinforce**: Share usage analytics (e.g., "You saved 40 hours this month") to remind them of the ROI and protect against poaching.
At-Risk	Low Adoption / Low Engagement.	**Intervene & Rescue**: Urgent executive-level review. Analyze behavioral "Red Flag Metrics" (e.g., short session times) to prevent imminent churn.

Integration of Google Workspace with customer support systems reduces resolution time by over 40% and improves customer service efficiency.

CleverTap

PLG in action: How CleverTap identified its ideal free trial period

CleverTap is the all-in-one customer engagement platform that helps brands personalize and optimize all consumer touch points to improve user engagement, retention, and lifetime value. The CleverTap team experimented to find the right duration for their time-based free trial, looking at the percentage of users who integrated out of those who signed up and the percentage of users who canceled their trials. After several iterations, they landed on 30 days, enough time for users to discover how valuable the platform can be, but it still comes with a sense of urgency.

A customer's decision to renew is effectively made within the **first 90 days** of their journey

Based on the Groove case study, users who stay in their first session for **over 3 minutes** are highly likely to retain, while those under 35 seconds are near-certain to churn.

Document Creation (Clio Draft):

Trigger: User manually types a client's name or address into a court form.
Preview: A auto-fill overlay that demonstrates how **Clio Draft** maps data directly from **Clio Manage**

Billing (Clio Manage):

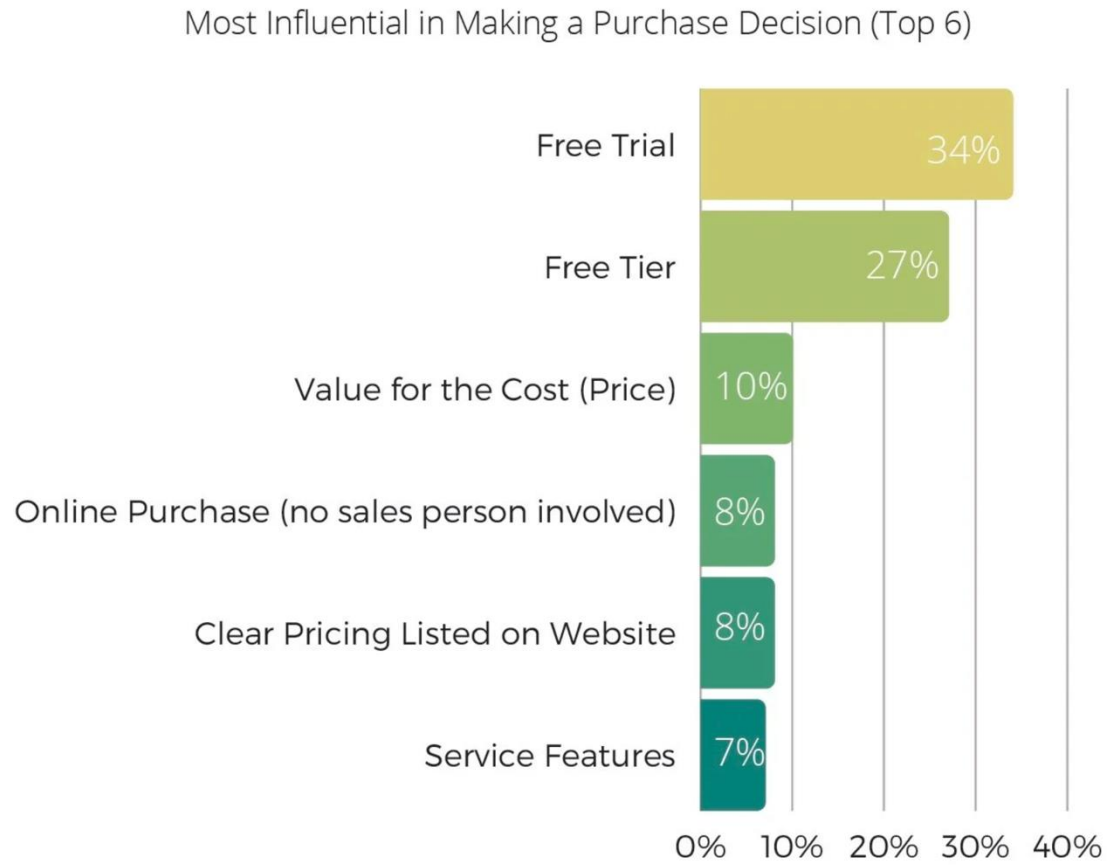

Trigger: A user completes a calendar event or task without logging time.
Preview: A autofill time entry showing the revenue lost—leveraging the fact that **30% of billable time is lost** without concurrent timekeeping.

Payments (Clio Payments):

Trigger: A user creates an invoice to be sent via email.
Preview: A preview showing the client's view with a **"Pay Now"** link versus a traditional paper check instruction.

Variable	Document Creation	Billing & Accounting	Payments
The "Aha! Moment"	Generating a completed court form in **<60 seconds** [17] [18].	Seeing an automated WIP report with **zero manual entry** [19].	Receiving the first **instant digital payment** [9].
Progressive Overload	Start with **pre-built templates** before showing custom logic [20] [21].	Start with **time tracking** before showing complex realization reports [22] [23].	Start with **payment links** before introducing trust accounting [9] [24].
Trial Model	**Matter-level trial** to reduce "social friction" [Conversation History].	**Reverse trial** (premium features on by default) to trigger loss aversion [25] [26].	**Credit-based trial** (first $X in processing fees free) [27] [28].
Decision-Maker Pitch	Focus on **accuracy and risk reduction** [6] [29].	Focus on **realization rates and profit leakage** [22] [30].	Focus on **cash flow and "Total Lockup" (WIP-to-cash)** [31] [32].

Free trials have a bigger impact on purchase decisions, with 34% of survey respondents choosing it as the #1 influencer, the #1 response to the question. Free version was a close second though, at 27%.

Appendix | Demo to trial sign ups

https://www.navattic.com/blog/when-to-use-interactive-demos-vs-free-trial-or-freemium-plans

Trainual, a knowledge transfer and training platform, was originally using a product video to draw in potential free trialers.

The problem with the video was that it wasn't showing users what it felt like to be in the Trainual product.

As the team put it, *"We wanted a way to showcase a curated and interactive version of our product. The goals were: 1) to get users to a light bulb moment before even starting a trial, and 2) to communicate value earlier in the evaluation process."*

In just a few weeks of publishing their first interactive demo, Trainual saw a:

- +450% lift in free trial signups when the interactive demo was displayed versus their original product tour video.
- +100% lift in users reaching activated trial status 7 days post-signup.
- +175% lift in users converting to paid customers in that same timeframe.

After user inactivity

Re-engagement tactics should be employed immediately after a user becomes inactive, typically defined as not engaging with the product for a specified period, such as 30 days. This is a critical window to remind users of the value your product offers and encourage them to return.

https://karilydersen.com/reengagement-strategies-tactics-timing-and-user-retention-for-digital-products/

64% of employees delay taking action during change initiatives because they wait for leadership direction instead of proactively engaging in the process

https://pollackpeacebuilding.com/blog/change-management-statistics/

So what factors are inhibiting firm-wide adoption? Data security concerns were cited as a significant barrier by 46% of respondents, followed by ethical concerns (42%), privilege concerns and lack of trust in results (each 39%).

https://www.lawnext.com/2026/03/ai-adoption-among-legal-professionals-has-more-than-doubled-in-a-year-new-8am-report-finds-but-firms-lag-far-behind-individual-practitioners.html#:~:text=In%202024%2C%2027%25%20of%20legal,span%20of%20a%20single%20year.

Appendix | Interactive Demos vs. Video and Static Manuals

Metric	Video / Static Manuals	Interactive Demos (The "Tab" Way)
Click-Through Rate (CTR)	~3.21% (Industry Avg)	**Up to 67%** (20x Uplift)
Completion Rate	Low (Passive drop-off)	**60% - 67%** of viewers reach the end
Trial Sign-up Likelihood	Baseline	**70% More Likely** after an interactive tour
Training Time	Weeks (12 weeks avg)	**Reduced by 83%** (Down to 2 weeks)
Creation Speed	Hours/Days to edit	**10x Faster** to build than polished video
