# personal CAPITAL

# Executive Summary | Personal Capital can expect $28,863,460 in revenue by 2029

**Situation**

Personal Capital is facing intense competition in a crowded digital wealth management market and must identify strategies to **differentiate itself**, expand its **customer base**, and achieve sustainable growth

**Solution**

**Cap²**

Leveraging a partnership with RightCapital to create a one-stop-shop experience offering new financial services and dashboard features

**Impacts**

| | | |
|---|---|---|
| **12.17%**<br>AuM CAGR | **$3.4B**<br>Total AuM in 2029 | **$28,863,460**<br>In revenue by 2029 |

# Situational Analysis

# Situation | Enhancing Personal Capital's appeal across consumers

## Guidance

- In 2022 a lack of financial literacy education cost 254 million Americans to lose more than **$436 billion** of their assets [1]
- Seeking a wealth advisors can add approximately increase **net returns by 3%** for their clients over time [2]

Source: *1* International Federation of Accountants, *2* Vanguard

## Generational Wealth

- **70%** of wealthy families lose their wealth by the second generation and **90%** by the third [1]

Source: *1* International Federation of Accountant

### Takeaway

*Personal Capital cannot soley rely on Robo-advising to assist clients in building their portfolios*

# Situation | Capitalizing on current market trends and potential partnerships

## Technology

The wealth management software market projects to grow from **$4.86 billion** in 2023 to **$15.55 billion** by 2032

## Simulations

Users get to map out their own journeys through **simulations**, knowing what may potentially happen with their money

## Partnerships

Partnering with another company will allow you to gain new features to offer to your clients

Personal Capital should prioritize promoting the **new technology** and **simulation opportunities** of their new partnership to gain more clients

# Situation | Personal Capital's comparison to two of their competitors

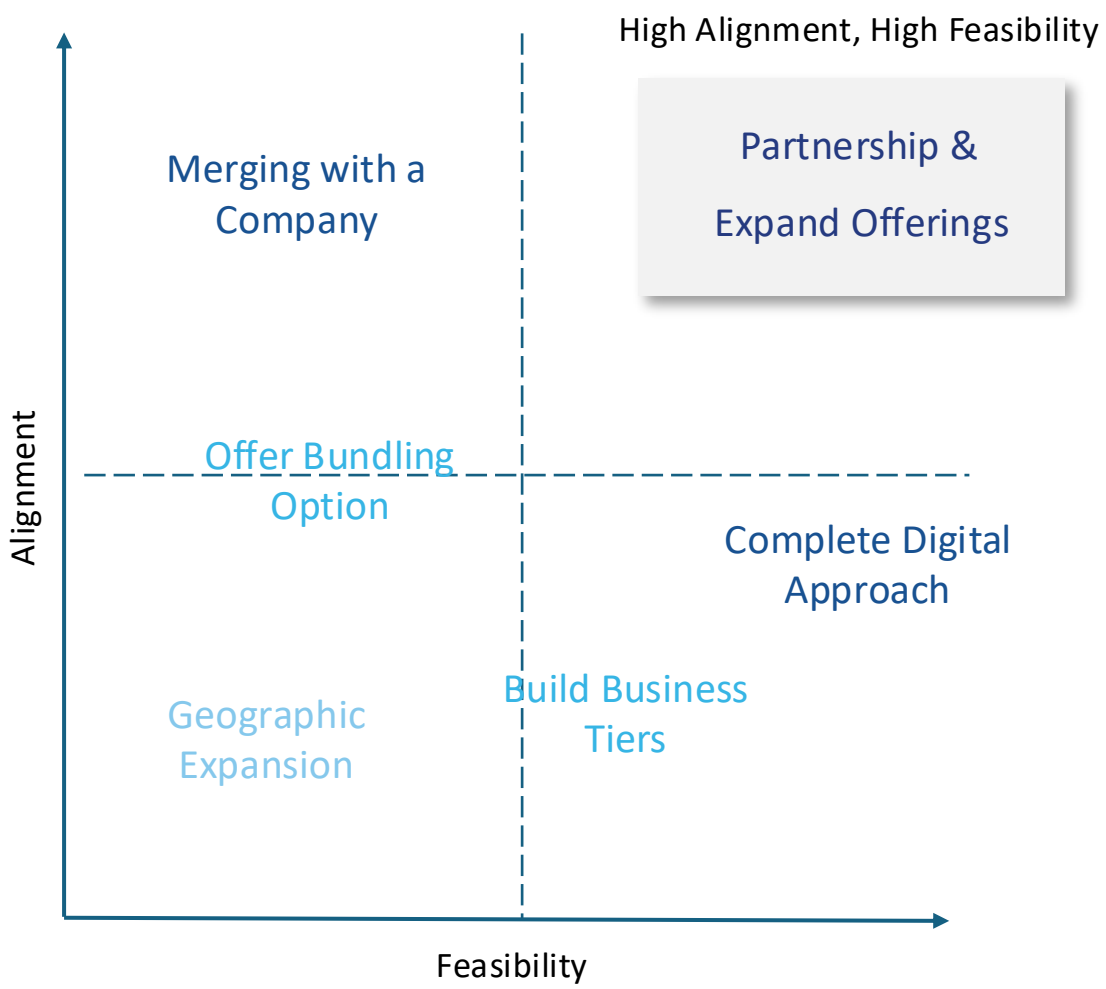

| | Metrics | personal CAPITAL | Vanguard | Wealthfront |
|---|---|---|---|---|
|  | **AUM** | $1.9 Billion | $31 Billion | $3.1 Billion |
|  | **Advisor** | Tech-augmented human platform | Tech-augmented human platform | Robo-Advisors |
|  | **Account Minimum** | $25,000 | $50,000 | $500 |
|  | **Target Audience** | Mass Market + High Net Worth | Mass Market + High Net Worth | Mass Market |

Personal Capital does not currently have any features that help differentiate yourselves from your competitors.

# Situation | Multiple strategies were considered considering the feasibility and alignment

## Our Comparison Shows…

## Metrics for Comparison

### Feasibility

01 Personal Capital can provide minority stake in the company for a partnership

02 Provide new features to improve customer experience and opportunities

### Alignment

01 Able to target high net worth individuals with new features

02 Allow for customization and personal connections to better reach your clients

# Strategy

# Strategy | Personal Capital should target customers like Marcus to better differentiate themselves from competitors

**Meet Marcus**

*Age: 51*

*Nearing retirement*

*Wants to ensure inter-generational wealth*

*High net worth individual ($1M+)*

## Advantages for Personal Capital

### Favorable Trends in Millennials and Gen X

Favor a collaborative approach where they stay in control of their wealth but have advice on important decisions

### Strategic Positioning Against Competitors

Competitors (Betterment, Wealthfront) are targeting lower net worth individuals, so HNWI clients are available

### Relevancy to Customers

Difficulties of maintaining generational wealth worsen when heirs have limited experience managing wealth

# Strategy | Personal Capital should partner with RightCapital due to synergies

**Reasoning:** By partnering with a company that can **simulate wealth planning**, Personal Capital can help ultra-high net worth people like Marcus foster **generational wealth**

| | Metrics | eMoney Advisor | wealthtrace™ | RightCapital |
|---|---|---|---|---|
|  | **Specialization** | In-depth financial analysis | Create and track retirement goals | Variety of services |
|  | **Onboarding** | Hard | Easy | Easy |
|  | **Pricing** | Expensive | Low | Low |
|  | **Target Audience** | Financial Advisors | Retirees | Anyone |

# Strategy | Case study supports benefits of combining tech and wealth management

## Case Study
## fusionIQ and interVal

FusionIQ, a provider of digital investment platforms, partnered with interVal, a fintech firm specializing in business valuation tools, to advance WealthTech solutions for financial advisors.

## Outcomes

- Enhanced advisory capabilities
- Market differentiation
- Boosted client base (business owners)

## Takeaways for Cap²

- Leveraging platforms to build intergenerational wealth
- Long-term potential in tech wealth management
- Tailor to client base (Marcus)

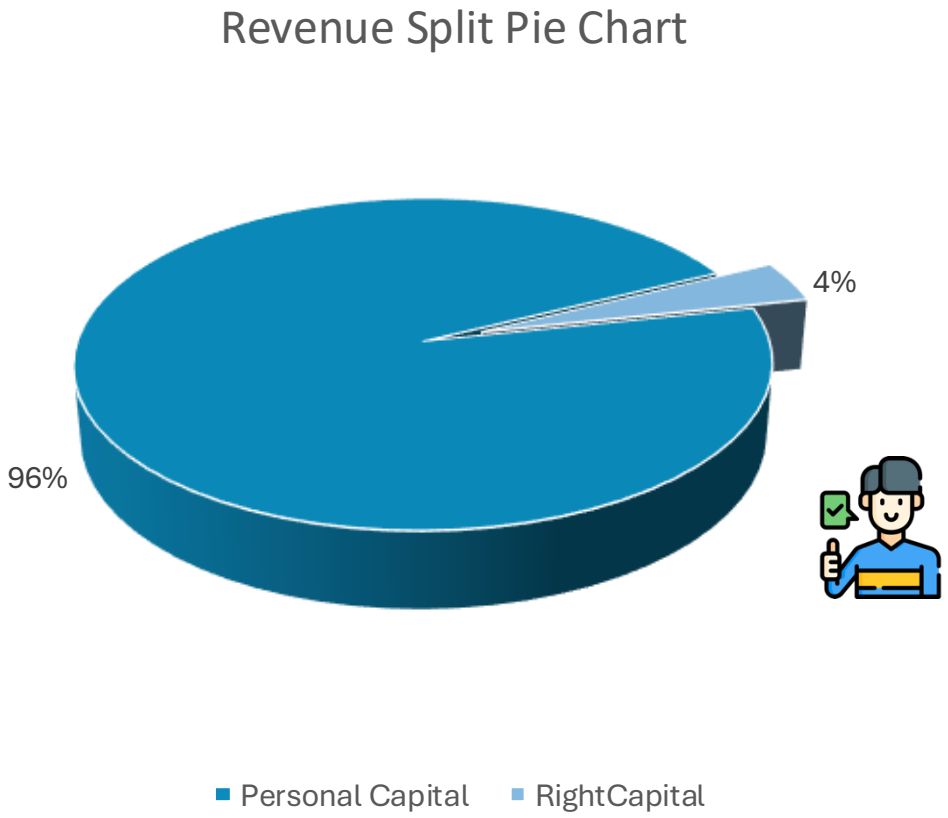

# Strategy | Through the revenue-sharing model, RightCapital will also have a lot to gain from the partnership

## Cap² Partnership

Personal Capital will share 4% of its revenue

The revenue is significant relative to a small company like RightCapital

### Access to Data

RightCapital can review valuable feedback from advisors and clients to **enhance its offerings**

### Brand Awareness

Personal Capital's large base of consumers will **be exposed** to RightCapital

# Implementation

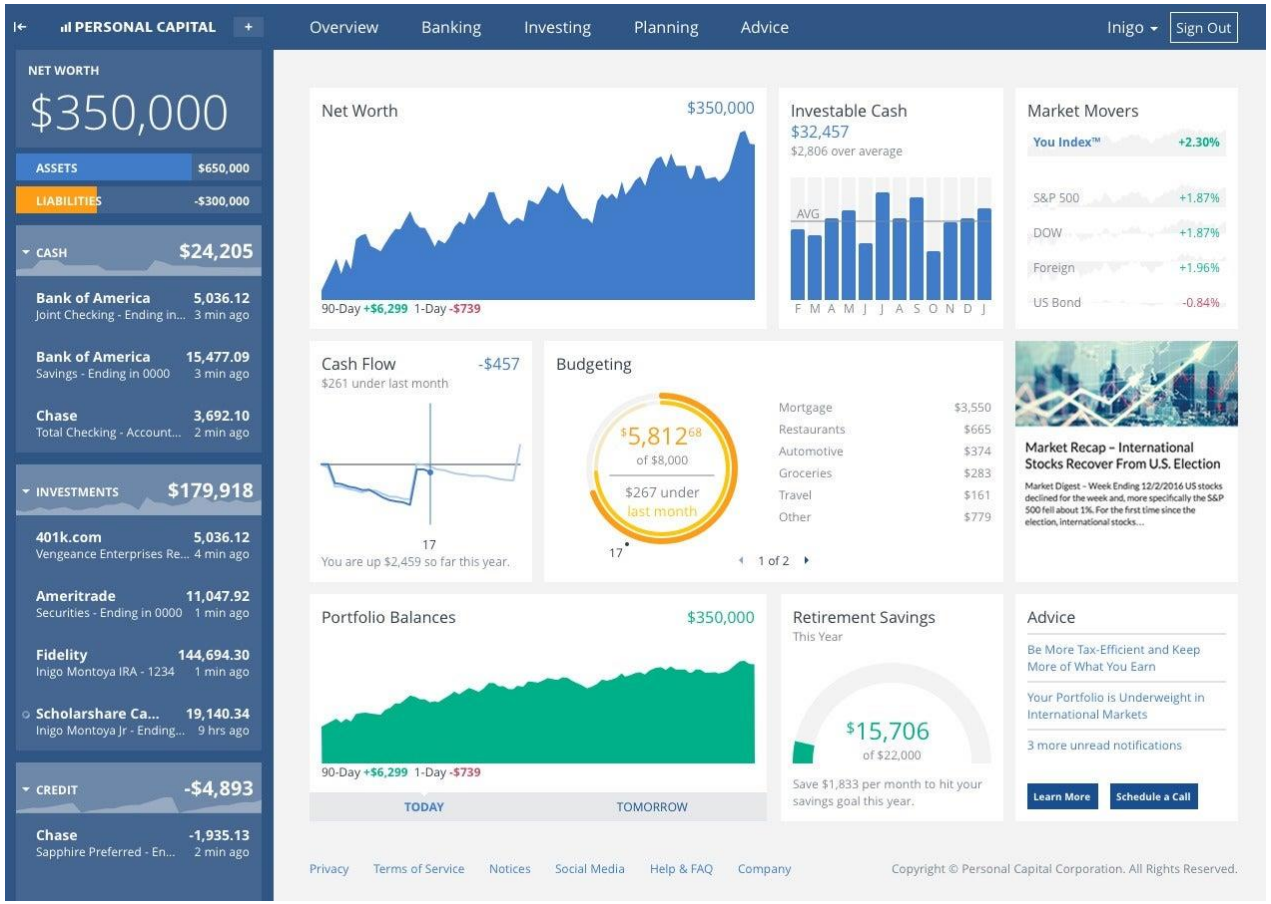

# Implementation | Personal Capital's current offerings focus on investment recommendations for the individual

## Current Offerings

Main offering is investment recommendations

Dashboard that integrates all of the client's accounts

Hybrid model that leverages technology while having advisors

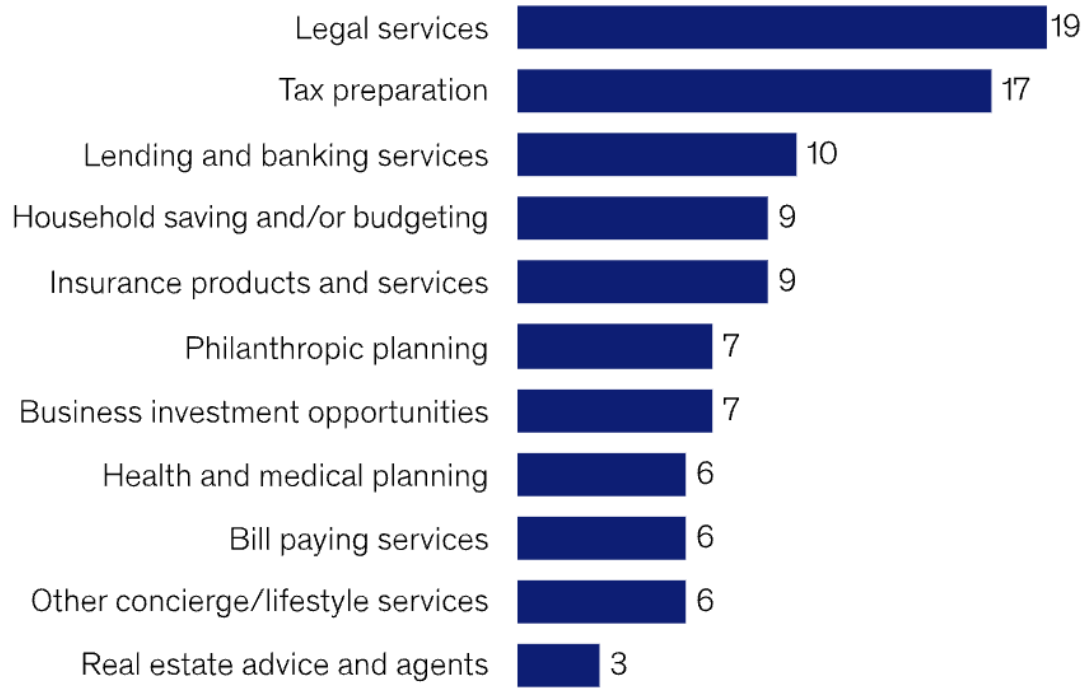

To differentiate from other players, Personal Capital should specifically target HNWI. But their current offerings do not cater towards these individuals.

# Implementation | However, there are still areas of growth based on the growing preference of holistic advice

| Current Offerings | Areas of Growth |
| --- | --- |
| Main offering is investment recommendations | Holisitc advice is increasingly popular. In particular, they find it most valuable if their wealth institution provides:<br><br>tax preparation<br><br>philanthropic planning<br><br>real estate advice |
| Dashboard that integrates all of the client's accounts | |
| Hybrid model that leverages technology while having advisors | |

**What services would you or do you find most valuable if provided by your wealth institution?,** % of respondents

*Source: McKinsey*

# Implementation | The partnership with RightCapital will add value to Personal Capitals' current offerings

## Current Offerings

Main offering is investment recommendations

Dashboard that integrates all of the client's accounts

Hybrid model that leverages technology while having advisors

## Areas of Growth

Holisitc advice is increasingly popular. In particular, they find it most valuable if their wealth institution provides:

tax preparation

philanthropic planning

real estate advice

## Integrated Dashboard

A one-stop-shop that offers tax optimization, legacy planning, financial simulations and more

# Implementation | The new features will fill the gaps in Personal Capital's offerings to better meet the demands of the target market

## New Features

1. Tax optimization, social security optimization, estate planning and philanthropy planning

2. Family wealth tools and financial literacy resources can support heirs in improving financial literacy

3. A user-friendly interface that doesn't have a steep learning curve

By expanding our offerings, we can establish ourselves as a premier option to HNWI looking to preserve their wealth

# Implementation | The new features will fill the gaps in Personal Capital's offerings to better meet the demands of the target market

## Marketing Trends in Wealth Management

- Word-of-mouth
- Centers of influence
- Personalization and exclusivity

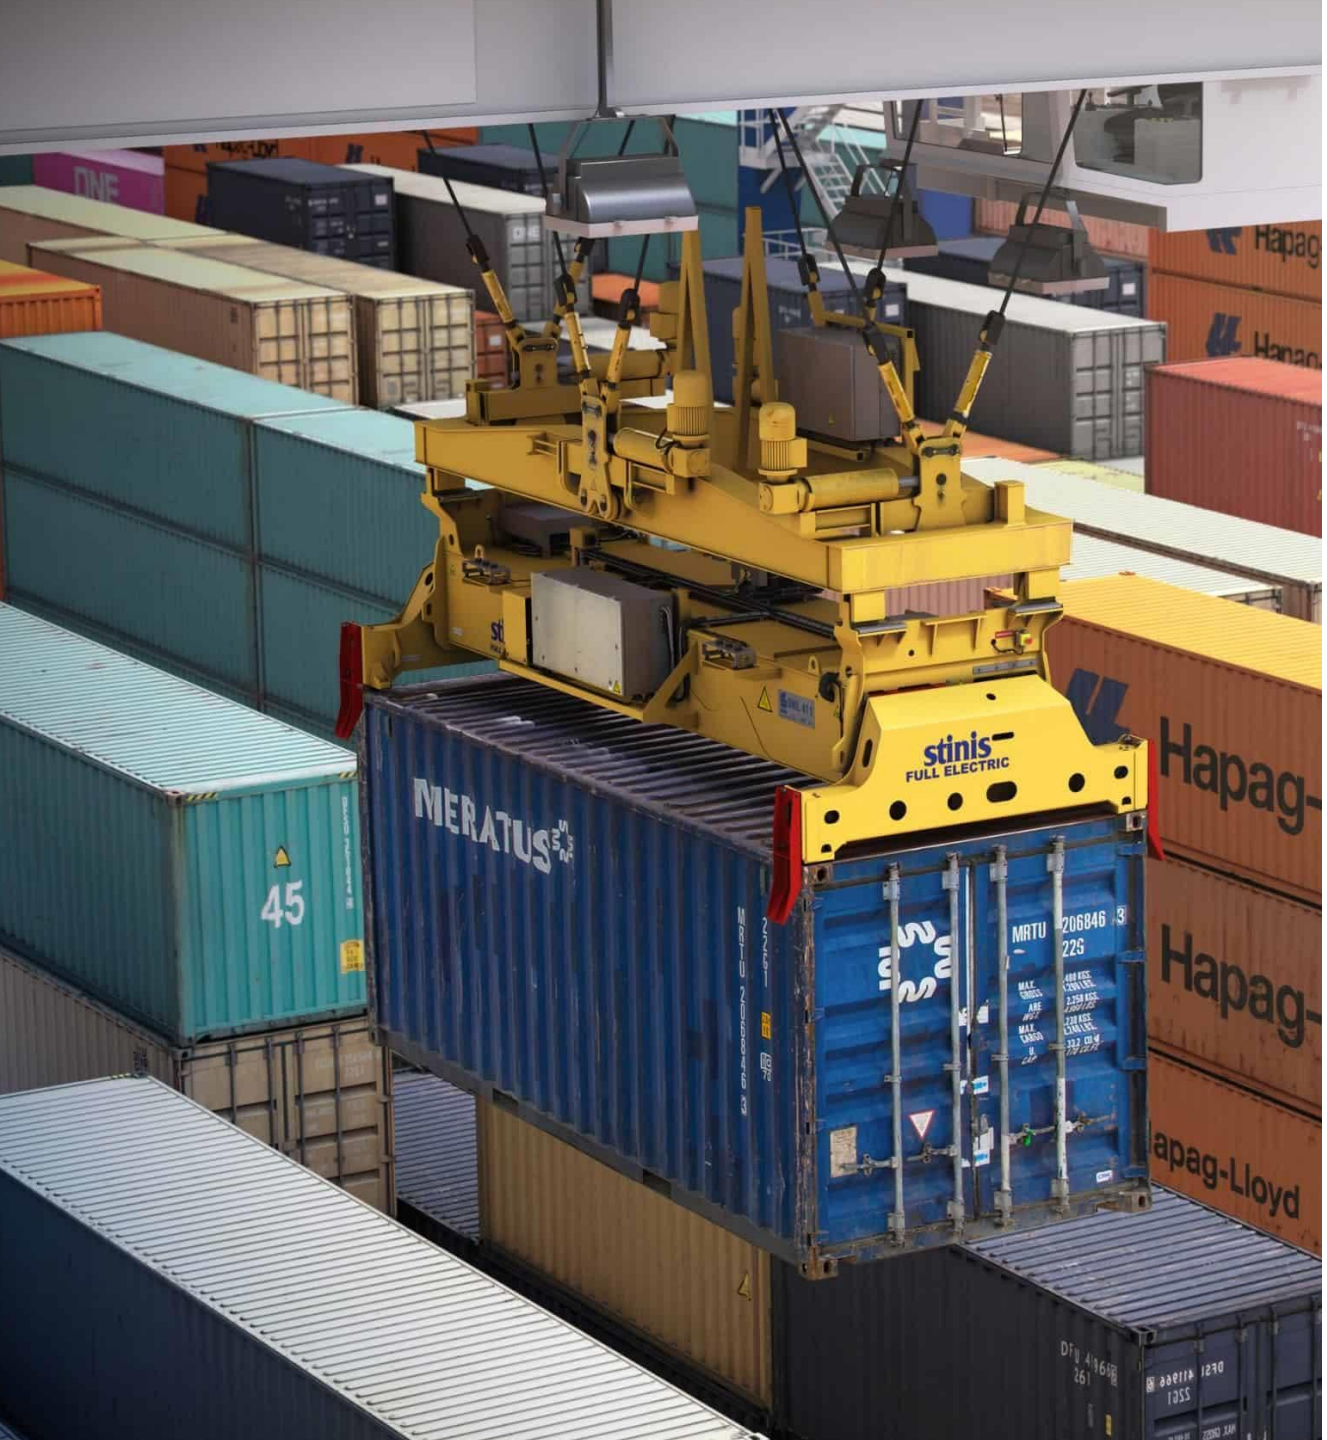

## Current Marketing Strategies

- Free financial tools to attract potential clients
- Billboard ads during sports games

## Additional Marketing

- Pop-up notifications on the dashboards
- Personalized message to through emails or advisors

# Impact

# Impact | Expected AuM Growth over 5 years of Implementation

## Drivers of AuM Growth

Client Number Increase

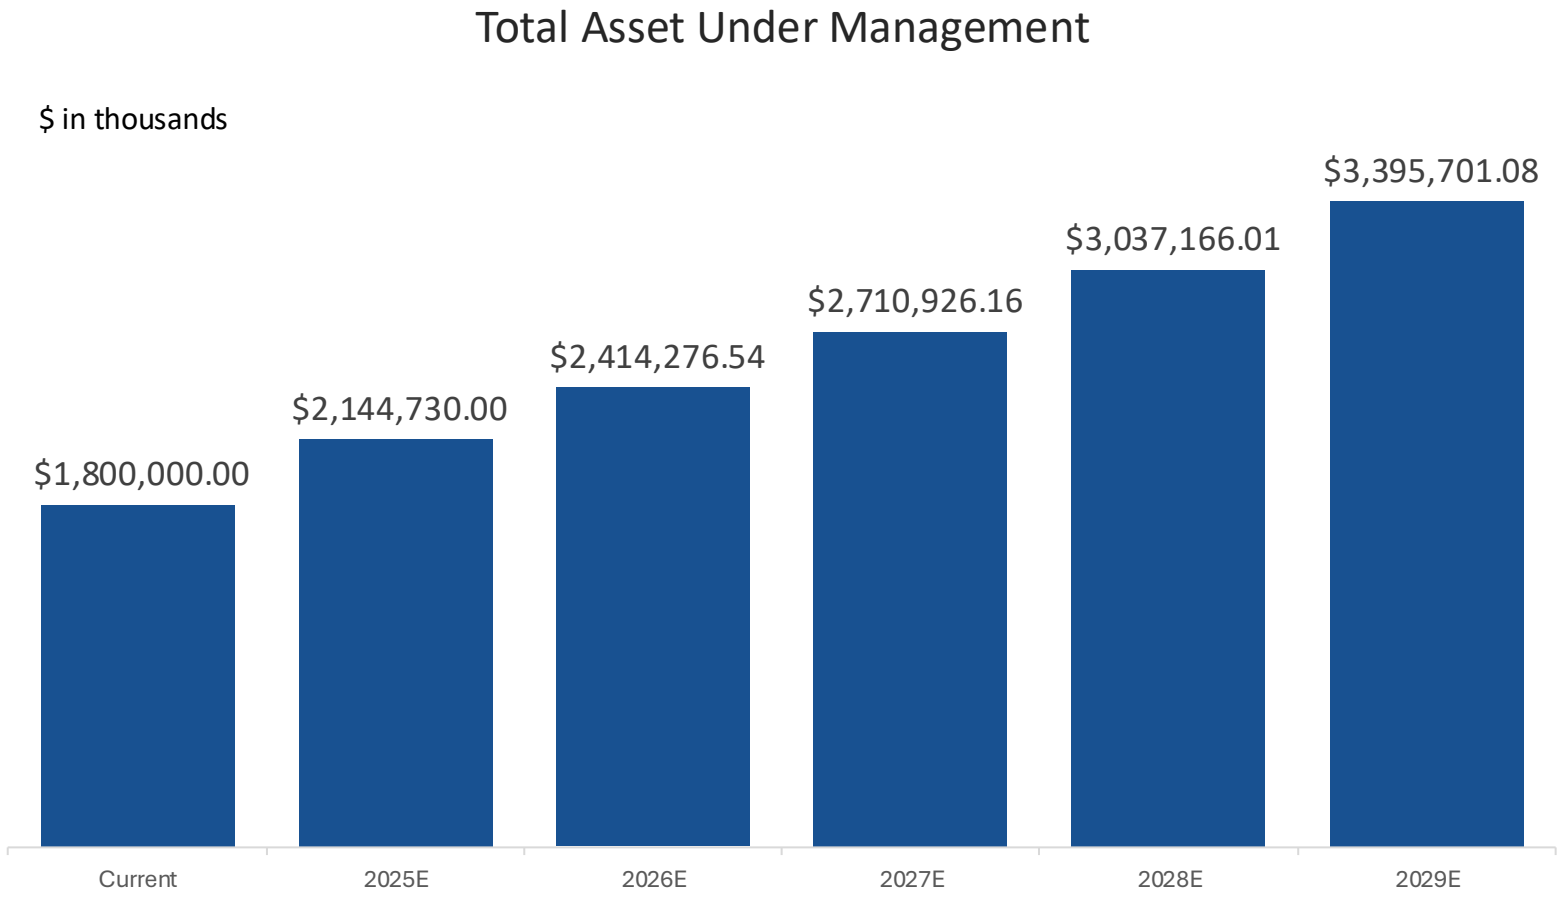

Average Asset Increase

## Growth Rate

Average Assets 5%

AuM CAGR 12.17%

Personal Capital will experience a 12.17% CAGR in total AuM

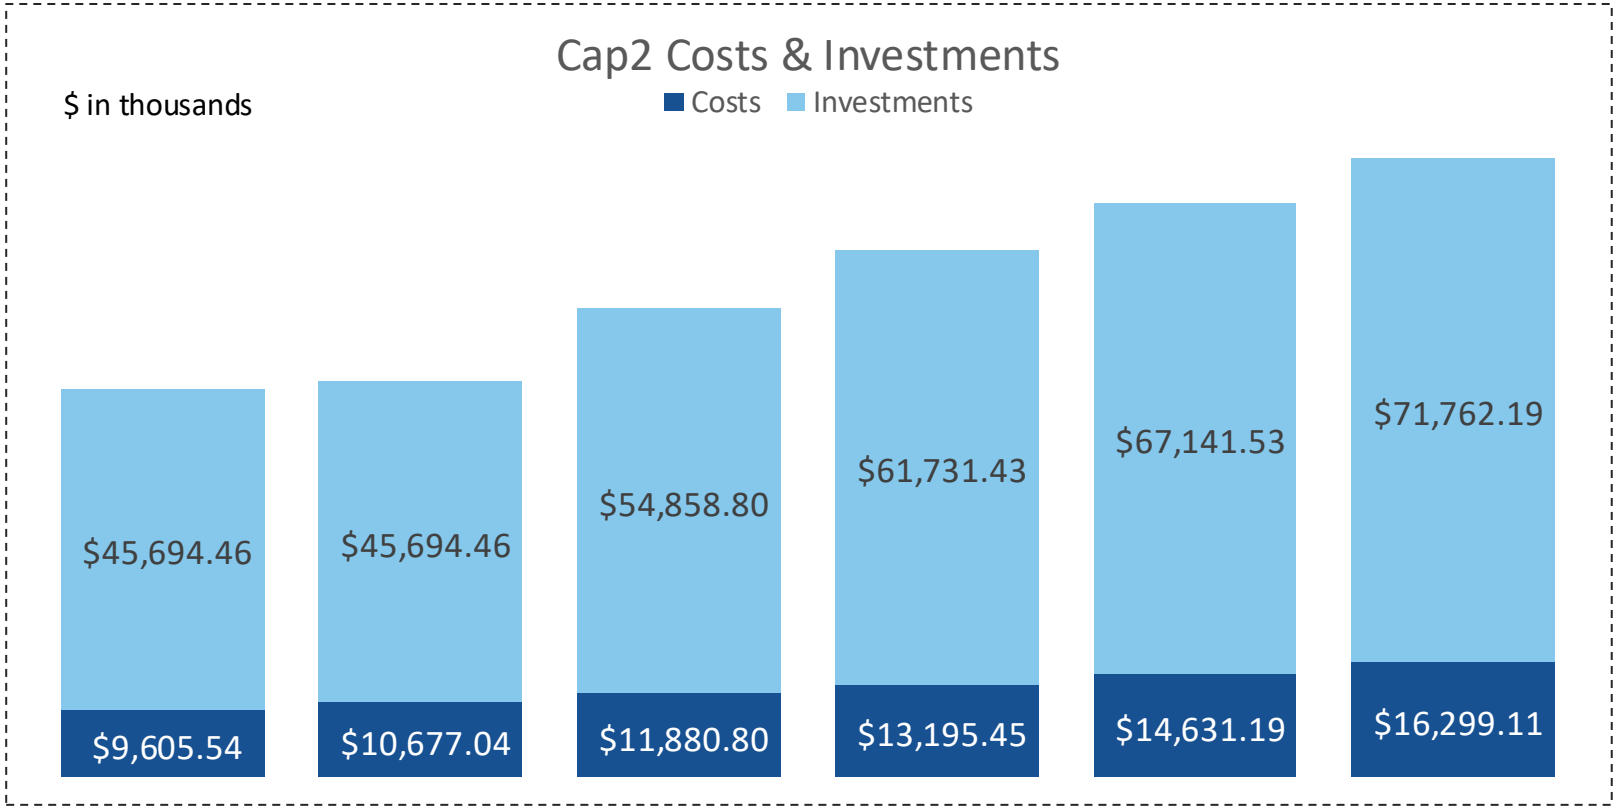

# Impact | Expected Costs over 5 Years of Implementation

## Cost Categories

- Customer Acquisition
- Advisor Compensation
- Licensing RightCapital
- Technology Updates
- Other Operating (SG&A)

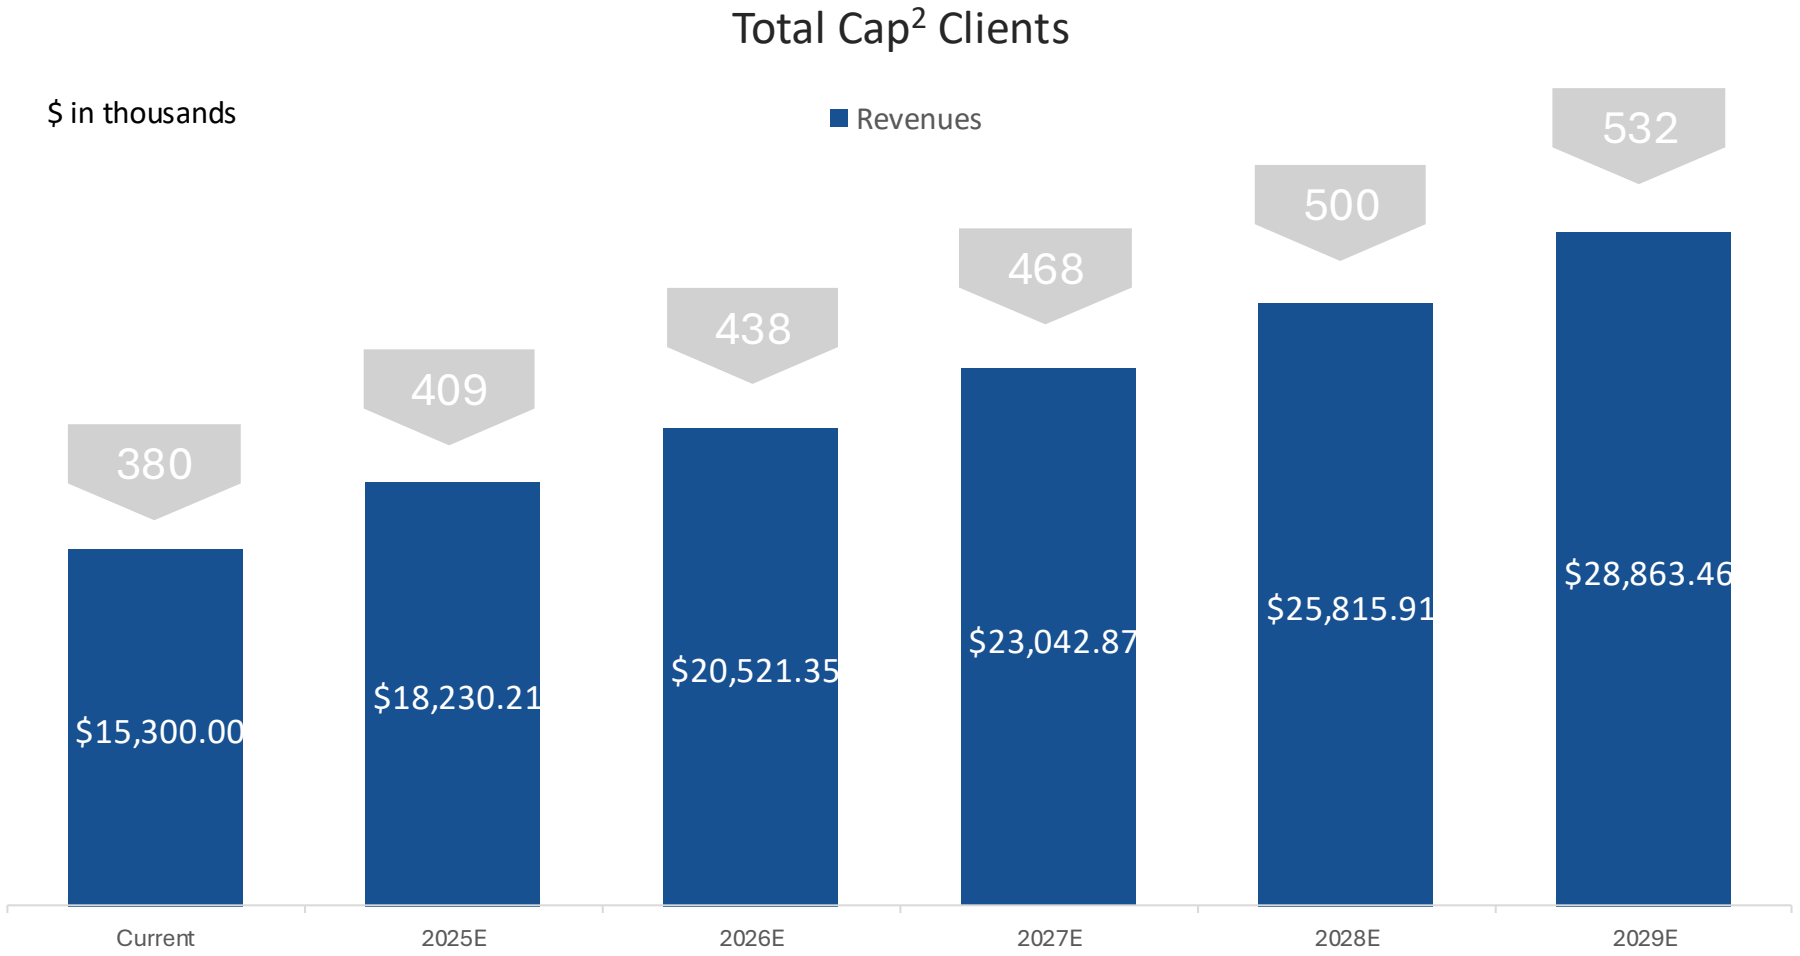

## Cost Summary

Personal Capital will incur $66.68M of costs in the next 5 years, along with investments to scale growth

# Impact | Expected Revenue Growth over 5 Years of Implementation

With growth in total number clients and average asset per client, Personal Capital is expected to experience steady growth in revenues.

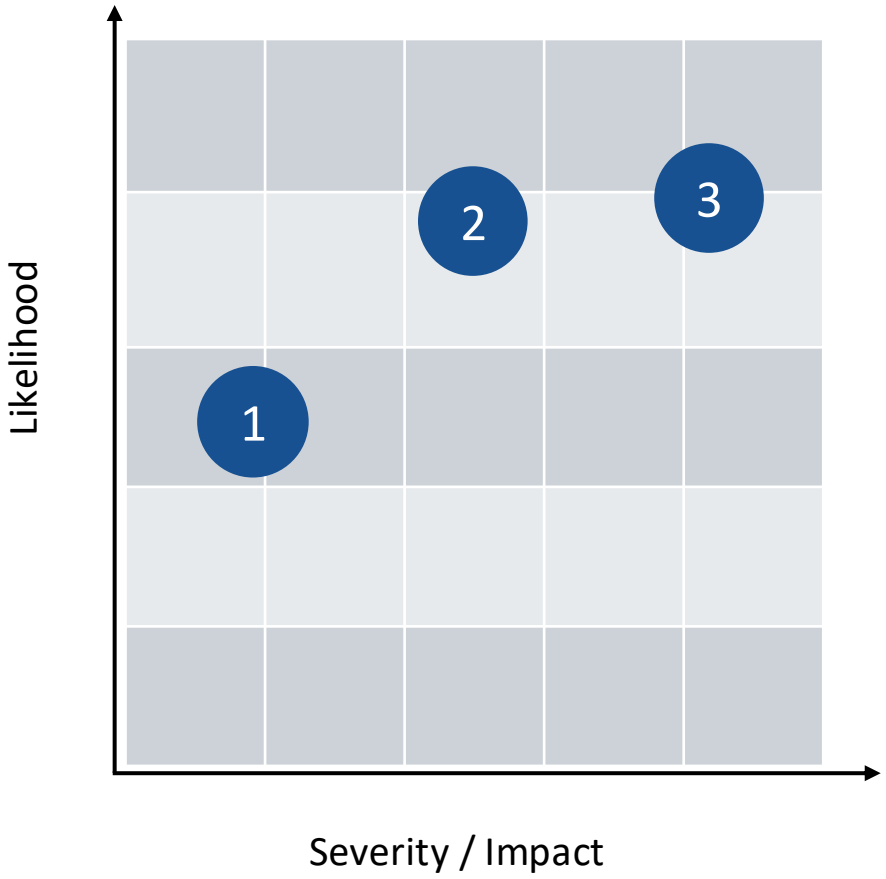

# Impact | The partnership will primarily take two years to implement, with regular fees and updates for the technology

| Timeline | 2025 H1 | 2025 H2 | 2026 H1 | 2026 H2 | 2027 | 2028 | 2029 |
|---|---|---|---|---|---|---|---|
| Initiate partnership | | | | | | | |
| Integrate with current platform | | | | | | | |
| Onboard advisors | | | | | | | |
| Platform maintenance and updates | | | | | | | |
| Provide tutorials/demos | | | | | | | |

## Next Steps

| | |
|---|---|
| 1 | Initiate conversation with RightCapital to inquire interest in partnership |
| 2 | Identify current platform needs to address with RightCapital technology |
| 3 | Back up current client data to prevent data loss during transition |

# Impact | Personal Capital may run into several risks

| Risks | Mitigation |
|---|---|
| 1 Onboarding with RightCapital | 1 Clear 20 minute video to teach clients and advisors |
| 2 Brand Dilution | 2 Strategically implement RightCapital in various areas of the dashboard |
| 3 Client Trust | 3 Information stays with Personal Capital and not RightCapital |

# Executive Summary | Personal Capital can expect $28,863,460 in revenue by 2029

Impact

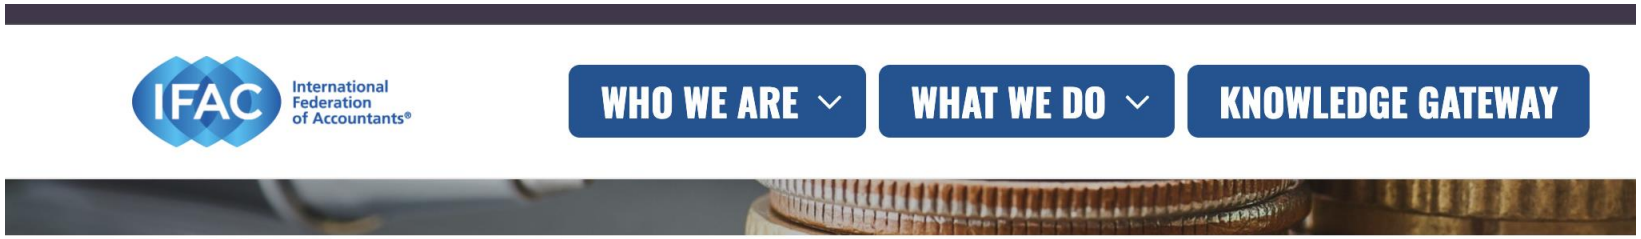

- IFAC Stat

April is National Financial Literacy Month in the US and a recent study uncovered the staggering cost of financial illiteracy. The National Financial Educators Council (NFEC) conducted a survey asking American adults to estimate how much money they had lost during the year 2022 because of a lack of financial knowledge. 3,001 people responded to the survey between October 23rd and December 5th, 2022. The average estimated amount of money that lacking knowledge about personal finances cost people was $1,819. Extrapolating the results to represent the 254 million adults who live in the U.S., lack of financial literacy cost Americans a total of more than $436 billion in 2022.

# Appendix | Reasons against geographic expansion

| | |
|---|---|
| 1 | **Regulatory Complexity**<br>They will have to understand and navigate local regulations which can require significant investments in compliance frameworks and expertise. |
| 2 | **Cultural Differences**<br>As an industry that heavily relies on trust, language barriers, cultural norms and expectations, religion etc… can impact their competitiveness in new markets |
| 3 | **Competition**<br>Wealth management is already an extremely saturated market, this will mean facing even more established local competitors, requiring significant effort to differentiate. |

# Appendix | Reasons against robo-advisors

| | |
|---|---|
| 1 | **Existing established players**<br>Betterment and Wealthfront are established players that currently use robo-advisors and both have more AUM and advanced technology. |
| 2 | **Dilutes brand image**<br>Households with investable assets of $25k to $100k are the core of many robo-advising companies. But Personal Capital targets mass affluent and HNWI. |
| 3 | **Not appropriate for target market**<br>Two-thirds of mass affluent individuals are over 55 years old and the highest average net worth is found in the 65-74 age group at $1.79 million. However, a survey conducted in 2021 showed that aged above 65, traditional banks were more highly trusted than fintech companies. |

*Source: Case study, Fidelity, Statista*

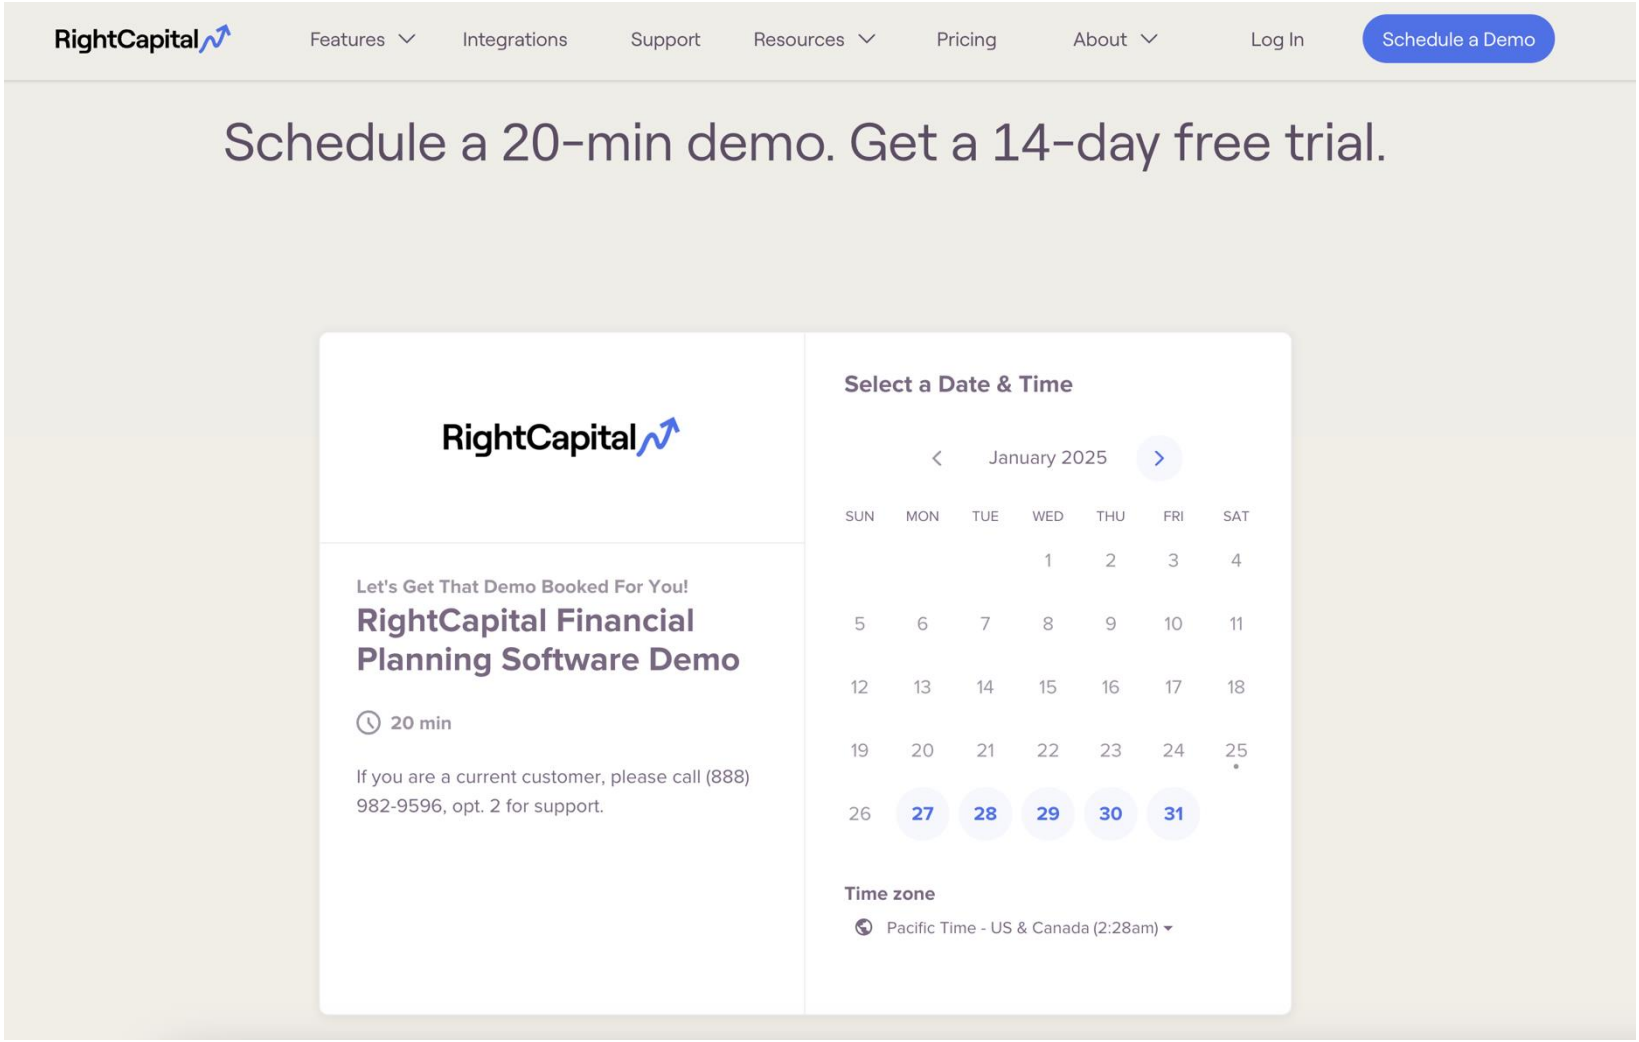

# Appendix | Reasons against M&A

| | |
|---|---|
| 1 | **High acquisition costs**<br>Acquiring companies that offer the complementary services can be expensive and may not generate sufficient ROI. Given Personal Capital's current financial position, this is not strategic. |
| 2 | **Strategic Focus**<br>Personal Capital strategically focuses on HNWI and a hybrid model. Merging with others that specialize in robo-advisory may cause brand dilution. |
| 3 | **Additional considerations**<br>Corporate culture, workflows, prioritization etc… may clash which can cause additional inefficiencies. |

*Source: Case study, Fidelity, Statista*

# Appendix | RightCapital has an extremely easy onboarding process

*Source: RightCapital*

# Appendix | Clients will benefit from this integrated platform

| | |
|---|---|
| 1 | **Seamless Integration**<br>Personal Capital is known for its financial dashboard which aggregated and tracked over $205bn in 2015. Clients won't need to transfer their data and input all of their information again. |
| 2 | **Everything in one place**<br>Clients want a one-stop-shop: in 2018, 29% said they prefer holistic advice across adjacent needs; in our 2023 survey, the figure jumped to 47%. |
| 3 | **Competition**<br>Wealth management is already an extremely saturated market, this will mean facing even more established local competitors, requiring significant effort to differentiate. |

# Appendix | Growth is around 5.4% for firms that did not engage in inorganic activities

**Inorganic strategies can drive growth.** Inorganic activity also helped fuel growth, with another record level of mergers and acquisitions (M&A) in 2022.[iv] Over the last five years, 19% of firms acquired new clients through M&A and 24% brought on an advisor with a book of business. Looking ahead, half of firms are pursuing an inorganic strategy.

All firms that had inorganic activity[v] in the past five years grew assets and clients at an annualized rate of 11.8% and 7.9%, respectively, from 2018 through 2022, compared with 8.3% and 5.4% for firms that have not engaged in inorganic activity over that period. It's important to remember that inorganic opportunities require thoughtful evaluation, because they can have a profound effect on a firm's organization, culture, and long-term strategy.

Source: Charles Schwab

# Appendix | IT spending as a percentage of revenue ranges between 4.4% to 11.4%

In considering IT spending as a percentage of revenue, the first important principle is that this metric varies greatly by industry. As shown in Figure 1, IT spending as a percentage of revenue in the financial services industry ranges between 4.4% at the 25th percentile to 11.4% at the 75th percentile. In contrast, discrete manufacturing companies spend 1.4% and 3.2% at the 25th and 75th quartiles, respectively. To put this in sharper relief, a financial services organization at the 25th percentile spends more than a discrete manufacturer at the 75th percentile.

Source: Avasant

# Appendix | Churn rate is around 5%

## Lessons from the last crisis

The 2008 financial crisis tested advisor-client relationships. Advisors saw client attrition spike to 10 percent in the first full year following the market decline. In the decade that's followed, the core value proposition of the financial advisor has come of age. Stock advice and trading evolved into portfolio design and execution, and now seems more deeply rooted in holistic wealth planning and coaching. Client relationships (net of market performance) are larger, relationships are deeper, and advisors are more likely to be the primary financial advice provider for the clients they work with. As a result of all these changes, client attrition rates fell to an all-time low of 5 percent in 2019.

# Appendix | Cost is projected to grow at 5% once the company becomes stable

Cost growth in 2022 slowed, growing at 5 percent versus the 7 percent average growth between 2016 and 2021 (and 14 percent growth in 2021), primarily due to the slower growth of client sales and service team costs, which represent two-thirds of total industry costs. In 2022, these costs grew only 3 percent, compared with the 9 percent per annum growth between 2016 and 2021. Client sales and service team compensation costs are largely tied to compensable advisory and brokerage revenues, which in fact decreased by 1 percent in 2022. In contrast to most years over the past decade, the growth in
